# **Land Use Report for Monroe County, New York 2013**

## **INTRODUCTION**

Funds from the Genesee Transportation Council (GTC) Unified Planning Work Program (UPWP) were provided as a grant to continue a system for annually reporting changes in land use within Monroe County. Up-to-date land use data is important for transportation modeling and analysis and will be used by GTC as inputs into their traffic simulation model. This land use information will be used to assess changes in land use, identify trends, guide capital project investments, and help pinpoint “hot spots” of traffic congestion that may become candidates for possible traffic management solutions such as Transportation Development Districts (T. D. D.) or Transportation Management Associations (T. M. A.).

Keeping track of growth is a task that is essential to sound land use decision-making. New land uses can place a strain on existing infrastructure and other community facilities. In reviewing development applications, communities should be aware of other proposed developments that could impact a proposed facility or the area in which the project is located. In response to the need to monitor proposed development, the Genesee Transportation Council and the Monroe County Department of Planning and Development initiated a process to identify all proposed projects and approved major projects within a computerized database that can be updated on an annual basis.

The emphasis on major projects is intended to identify significant economic activity that can generate high levels of vehicular traffic that could impact traffic operations on a particular highway or within a transportation corridor. This information is obtained as early as possible in the development process and actual construction activity each year until the project is completed.

Our department files also contain detailed data on proposed projects, which are below the thresholds for major projects. However, we did not monitor these “minor” projects to determine if or when they were approved or constructed. Information on the location and type of proposed minor projects may be important in the future to determine the cumulative development impacts of both major and minor projects when considering specific infrastructure improvements or in analyzing development trends.

## **LAND USE DATA**

### **Project Database**

This database is a compilation of selected information about proposed residential and non-residential development projects which have been submitted for county review under General Municipal Law § 239-1, -m, -n by the city, towns and villages. The status of each project is tracked through construction, denial, or withdrawal. For the actual project status as of the spring of 2014, each municipality was contacted.

Information on proposed and approved projects was gathered from a variety of sources including our computerized log in system, from project reporting forms completed by municipal officials, and discussions with local officials.

### **Major Project Criteria**

This database focuses on those proposed projects that could have significant traffic impacts. It would be cumbersome to track every project that has been proposed in the county. To reduce the volume of proposed projects, thresholds were established to eliminate those that are not deemed to be significant traffic generators. The criteria used are as follows:

- 5 or more residential lots or dwelling units; OR
- 5,000 square feet of non-residential gross floor area; OR
- Rezoning for an area of 10 acres or more.

Department staff identified those major projects proposed within each calendar year, which meet these thresholds. Detailed information on each proposed major project is recorded on a Municipal Land Use Monitoring Report form, which is submitted to municipal officials for their verification of all data for each project.

### **Additional Land Use Data**

The following additional data has been collected for this report:

- Table A. Residential Building Permit Information
- Table B. Proposed Major Projects in 2013
- Table C. Cumulative Report on the Status of Major Projects: 1992-2013
- Table D. Cumulative Status of Rezoning – Potential Development: 2003-2013
- Table E. Potential Development: 2014-2016

## Residential Building Permit Information

Table A. shows residential building permits issued by municipality for single family, two (2) family, three (3) or four (4) family and other family in Monroe County. The building permit data was obtained directly from the municipalities and is consistent with the Genesee/Finger Lakes Regional Planning Council's Regional Land Use Monitoring Report. These building permits are for new construction only.

The following table shows a breakdown of data for residential building permits issued in 2013.

	Number Building Permits Issued	% of Total Building Permits Issued	Municipalities with Most Significant Construction
Single Family	675	93%	Gates (80); Greece (92); Henrietta (80); Penfield (120)
Two (2) Family	40	5%	Greece (28); Webster (7)
Three (3) or Four (4) Family	6	1%	Brighton (2); Honeoye Falls (1); Pittsford (1); Spencerport (2)
Other Family	6	1%	Brighton (1); Clarkson (2); Fairport (1); Henrietta (1); Rochester (1)
<b>Total Permits Issued 2013</b>	<b>727</b>	<b>100%</b>	

## Proposed Major Projects in 2013

Table B. indicates there were a total of 95 major projects proposed in Monroe County in 2013. Eight (8) of those projects included applications for re-zoning, which is often the first indication of future development activity. The data in Table B also indicates residential projects which are senior or special needs facilities. Residential conversions, which would include all industrial, commercial or vacant buildings that are converted for residential use, are also identified in this table.

Of the 95 major projects proposed in Monroe County in 2013, the majority came from a handful of municipalities. Henrietta had the most major projects with 19, followed by Greece with 11, and the Towns of Chili and Penfield, both with 7.

The proposed major projects data indicates there were 46 projects with residential development in 2013. The remaining balance of 49 projects therefore was non-residential development.

## Cumulative Report on the Status of Major Projects: 1992-2013

Table C. is a status report for all major projects in Monroe County between 1992 and 2013 listed by land use. In cases where a project is not listed under a land use category the type of development has not been identified.

The only way a major project will be deleted from this cumulative list in future years is: 1) if the project has been denied; 2) if the project has been approved, but then subsequently withdrawn; or 3) if construction has been completed.

This table is a valuable resource within the Land Use Report because many major projects take longer than one year to work through the approval and construction process.

Cumulative Status of Rezoning – Potential Development: 2003-2013

Table D. This table is an accumulation of all rezonings in Monroe County, which have not resulted in final construction between 2003 and 2013. In cases where a project is not listed under a land use category the type of development has not been identified.

Potential Development: 2014-2016

Table E. is constructed from information supplied by the municipality as known major projects which are in the “pipeline” but have not been formally submitted for approval in 2013.

## DESCRIPTION OF DATABASE ELEMENTS

The following description of the database elements can be used to interpret the data provided in the attached tables:

Applicant's Name: The name of the applicant as it appears on the development referral form submitted to Monroe County Department of Planning and Development.

Census Tract Number: Small statistical subdivisions of a county determined by the United States Census Bureau.

Development Information: The name used by NYS and the Monroe County Real Property Tax offices to identify property categories.

Land Use Code: The three-digit number used by NYS and the Monroe County Real Property Tax offices to identify type of land use.

Number of Lots: Number of lots resulting from any subdivision of land.

Number of Units: Applies to number of units in an apartment project or a motel/hotel.

Parcel Address: The name of the primary access road to the property.

Project Name: The title or most recognized reference name for the proposed project, if available.

Project Status: Indicates if a project is approved, pending approval, under construction or complete.

Referral Number: This is Monroe County's identification number assigned to each proposed project submitted for our review. The capital letters represent the municipality, the year the project was initially proposed follows, and then a file number was assigned to each project. The letter at the end identifies the type of review (S = subdivision, Z = site plan review, special permit, or any other type of zoning action, and A = airport review).

Residential Conversion: Indicates that an industrial, commercial or vacant building was converted for residential use.

Senior Housing: Indicates that a project is for senior housing.

Special Needs: Indicates that a project is for a special needs development.

Tax Account Number: The County's Real Property Tax number.

Total Acreage: Total acreage of site to be developed.

Total Gross Floor Area (GFA): The total square footage of gross floor area (if available).

Transportation Analysis Zone (TAZ): This code number identifies the location of a property for use in the computer modeling system of Genesee Transportation Council.

## LAND USE CLASSIFICATION CODE

The New York State Office of Real Property Services has developed a simple and uniform classification system to be used in assessment administration in New York State. The system of classification consists of numeric codes within specific land use categories (listed below). The land use code indicated for each project in the Development Referrals File of approved major projects conforms to this system and all land use codes found in the file are described below:

### Land Use Code Numbers and Categories

<b>100</b>		<b>AGRICULTURAL</b> (Property used for the production of crops or livestock)
	105	Agricultural vacant land (productive)
	110	Livestock and products

	990	Other taxable state land assessments

## LAND USE CLASSIFICATION: NUMBER OF PROPERTIES AND ACREAGE

The following tables were created by summarizing all of the land use codes by nine general land use categories and calculating the total number of parcels, or properties, in each category. The property acreage was also aggregated for each category. Percentages were calculated for both properties and acreage. The first Land Use Classification Table provides a compilation of data for all municipalities in Monroe County. The second table provides the 2013 Property Classification Summary Final by Municipality.
