January 7, 2021

To Whom It May Concern:

We look forward to continued support of the Multicraft Apprenticeship Preparation Program (MAPP) and the affiliated "On-the-Job" training component; Project Pheonix.

MAPP is a program geared towards pre-apprentice individuals who are entering the workforce by means of various construction trades. This program is innovative and focuses on supporting individuals who are members of underserved populations, moving them from near poverty to being contributing members of society with successful careers.

We look forward to the positive impact this program has on our youth, and the opportunities that are made available to them to find a lifelong career.

With your support we can work together to offer successful learning and career opportunities for those less privileged we hope to count on your support of this program.

Thank you

Lori Sheldon
