Part 3 Determination of Significance**

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

Monroe County is providing APRA Funds to Multicraft Apprenticeship Preparation Program, Inc. ("MAPP") to expand its existing training program. This includes programmatic and service delivery, as well as expanding their operation into an enlarged facility. It is anticipated that the MAPP training center expansion will renovate an existing space for both academic tutoring and hands-on training in general and skilled trades. Expansion is expected at its current space or a new space within an existing commercial, light industrial, industrial setting. Such a site will be previously disturbed and/or built out and only require renovations. As this expansion is anticipated to be primarily interior renovations and/or located in a suitable light industrial to industrial site it will not impact the character, aesthetics, or historic resources of the area; it will not impact or increase the potential for erosion, flooding, drainage problems; nor will it create a hazard to human health or environmental health.

<input type="checkbox"/>	Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.

 Part 3 Determination of Significance**

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

Monroe County is providing ARPA Funds to Big Brothers and Big Sisters of Greater Rochester (BBBSR) to expand its mentoring program. This includes programmatic and service delivery, as well as expanding their operation into a new mentoring center in Downtown Rochester at 214 Alexander Park. BBBSR's lease of commercial space may also include some interior renovations and/or signage, which must be completed in accordance with City of Rochester zoning and building codes. Build out of this existing interior space, if any, will not impact surrounding commercial space, which is of similar office/service delivery use. The facility is within one block of public transit and within three blocks of dedicated bicycle lanes and abundant surface parking and transportation options are available. As this expansion is into existing commercial space it will not impact the character, aesthetics, or historic resources of the area; it will not impact or increase the potential for erosion, flooding, drainage problems; nor will it create a hazard to human health or environmental health.

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Monroe County is providing ARPA Funds to Volunteers of America, Inc. to construct an approximately 21,000 square feet hydroponics facility on a remediated brownfield at 214 Lake Avenue, Rochester, NY. The facility will be used to grow fresh produce. The facility will be a maximum of .5 acres and will be located at the rear of the parcel, with no frontage along Lake Ave. The brownfield site has been previously disturbed at the time a prior building was constructed and again when the parcel was remediated. The eastern edge of the property is more than 200 feet from the Genesee River and separated from the river by other developed parcels. It is not on, or adjacent to, a NYS Critical Environmental Area designated by the City of Rochester along the Genesee River, floodplain, wetland or archaeological site. The site is not adjacent to any properties on, or eligible for, the state or federal register of historic sites. This site, and neighboring parcels are a mix of former industrial and commercial properties and is now zoned for light industrial, commercial, retail, and regional/community amenities. All construction and development will need to be in accordance with City of Rochester zoning and building codes.

Accordingly, the proposed action will not result in any significant adverse environmental impacts.

<input type="checkbox"/>	Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.

 Part 3 Determination of Significance**

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

The Environmental Mapper indicates that the subject property, or an adjoining property, has been the subject of remediation. The Environmental Mapper also indicates the site is located in an archeologically sensitive area. The action is for the lease of the property and does not include the physical alteration nor disturbance of the property. Therefore, there will be no significant adverse impact to archeologically sensitive areas.

Lease of office space at 400 West Avenue is an existing commercial space. All renovations will be interior and/or signage related and will be in accordance with City of Rochester zoning and building codes. Build out of existing interior space will not impact surrounding commercial space, which is of similar office/service delivery use. The facility is within one block of public transit and dedicated bicycle lanes and abundant surface parking and transportation options are available. As this expansion is into existing commercial space it will not impact the character, aesthetics, or historic resources of the area; it will not impact or increase the potential for erosion, flooding, drainage problems; nor will it create a hazard to human health or environmental health.

Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.

Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action will not result in any significant adverse environmental impacts.

The Director of Finance – Chief Financial Officer is hereby further delegated all powers of this County Legislature with respect to agreements for credit enhancement, derived from and pursuant to Section 168.00 of the Local Finance Law, for such bonds or notes, including, but not limited to the determination of the provider of such credit enhancement facility or facilities and the terms and contents of any agreement or agreements related thereto.

Section 5. All other matters, except as provided herein, relating to such bonds or notes, including prescribing whether manual or facsimile signatures shall appear on said bonds or notes, prescribing the method for the recording of ownership of said bonds or notes, appointing the fiscal agent or agents for said bonds or notes, providing for the printing and delivery of said bonds or notes (and if said bonds or notes are to be executed in the name of the County by only facsimile signatures, providing for the manual countersignature of a fiscal agent or of a designated official of the County), the date, form, denominations, maturities, interest rate or rates, terms of and manner of sale and interest payment dates, place or places of payment, and also including the consolidation with other issues, shall be determined by the Director of Finance - Chief Financial Officer. **OUTCOME ASSESSMENT
METHODOLOGY:**

All program activities are designed to promote goal achievement and be quantified, measured and tracked. Routine (monthly, quarterly, annually) reviews of progress activities and outcomes allow modifications to be made as needed to support successful outcomes and goal achievement. Measurement tools are developed, and data is collected, reviewed and analyzed by program administrators and the agency Board of Directors, and is used to mark progress toward program goals and to make quality improvements. Measuring program performance is accomplished by querying the agency's Management Information System (which has been maintained for over 23 years) to generate utilization, outcome and impact reports no less than quarterly which is essential to planning, updating, revising and developing new procedures, protocols and services.

Reports compare actual outcomes to the projected outcomes and are used to inform service methodology or program objective modifications needed. These reports also identify emerging trends, changes in client demographics, geographic distribution and service utilization. Program goals are quantified so that data can be collected and progress evaluated. The efficacy of services/activities is reflected in the impact (i.e., knowledge gained, skills developed, and behavior change) on the participant and by their direct feedback as to its relevancy. Service methodology is modified as needed to improve efficacy. In this way, services remain client-centered and directed, current and meaningful and successful services/activities are noted and replicated.

All interventions in the registry have met NREPP's requirements for readiness for dissemination. The NREPP is a program of the Substance Abuse and Mental Health Services Administration (SAMHSA), a branch of the U.S.

Department of Health and Human Services. SAMHSA's mission is to reduce the impact of substance abuse and mental illness on America's communities. The purpose of NREPP is to help the public learn more about mental health and substance abuse programs and determine which of these may best meet their needs.

The Compeer Model includes thorough mentor screening, comprehensive training and ongoing monitoring of the mentor-mentee match. Fidelity to the Model maintains the integrity of the match and the increased likelihood that match goals will be achieved.
