

## **APPENDIX G**

### **Suggested Updates to the Special Conditions of the Permit**

As requested in comment 2 from the April 1, 2011 letter from the NYSDEC, WMNY has provided the following suggested updates to Special Conditions of Part 360 Permit.

Condition I.1. General Applicability

- (a) Update to read as follows: Permit application to Construct and Operate Solid Waste Management Facility pursuant to 6NYCRR Part 360 dated November 16, 1990, application for Churchville/Mill Seat Pump Station and Force Main Project dated August 2003, and 6NYCRR Renewal Application dated January 20, 2011.
- (e) Delete “and subsequently revised March 2002 (Design Modifications for State IIIA),” as this was not a global design change, but a set of cell specific construction plans as required by Condition No. II.12.
- (f) Delete this reference; these drawings are no longer relevant to ongoing operations.
- (h) Update to read as follows: Environmental Monitoring Plan revised April 2011 and Site Analytical Plan revised September 2003.
- (k) Add to this item: Wetland Delineation Report for the Proposed Borrow Area dated August, 2009.
- (l) Change date to April 8, 2011
- (m) Add to this item: Draft Supplemental EIS dated January 2011 and Final Supplemental EIS dated April 2011.
