## **East Ridge Road Improvement Project Newsletter**

September 5, 2013

This informational newsletter provides an update on the status of the project and communicates upcoming activities to affected properties and interested parties.

### **Project Description**

This Monroe County Department of Transportation Project involves the road rehabilitation of 2.49 miles of East Ridge Road in the Town of Irondequoit, from the Rochester City Line (near Marburger Street) to Culver Road. The project is broken up into 5 phases running from major intersection to major intersection. The phases are:

Phase 1: City Line to Hudson Avenue (**Complete**)                      Phase 2: Hudson Avenue to Carter Street (**Complete**)  
Phase 3: Carter Street to Portland Avenue                      Phase 4: Portland Avenue to Goodman Street  
Phase 5: Goodman Street to Culver Road (**Complete by September 16<sup>th</sup>**)

Each phase will have a separate one way detour in order to complete the work in each phase. The one way detour will allow traffic to proceed in the eastbound direction while detouring westbound traffic around the work area with a posted detour.

### **Current Project Status/Update**

**The Phase 3 Detour, Carter Street to Portland Avenue, will be initiated on September 16, 2013.** The new traffic pattern will detour westbound traffic on E. Ridge Road from Portland Avenue to Carter Street in order to rehabilitate the asphalt pavement. See the next page for a map of this detour. We estimate that this detour for Phase 3 will be in place for approximately 6 weeks. Upon completion of Phase 3, the next detour will be Phase 4. Future newsletters will provide the date of this upcoming detour.

The project will need to work in the roadway and sidewalk area and will impact access to driveways at times. For locations with multiple accesses, we will keep at least one access open when we are working in front of these areas. There will be periods of time that will require the area in front of a driveway entrance to be only in stone/gravel until the roadway pavement can be installed.

In an effort to complete the project in 2013, work on Phase 4 (Portland Avenue to Goodman Street) has also started without a detour. The curb lane is being worked on during the day in order to install the curbing and sidewalk. Once the curbing and sidewalk are complete the lane will be reopened. With this work occurring before the placement of the detour, it will mean that the amount of time needed for detour for Phase 4 will be reduced.

### **Project Contact Information If you have questions:**

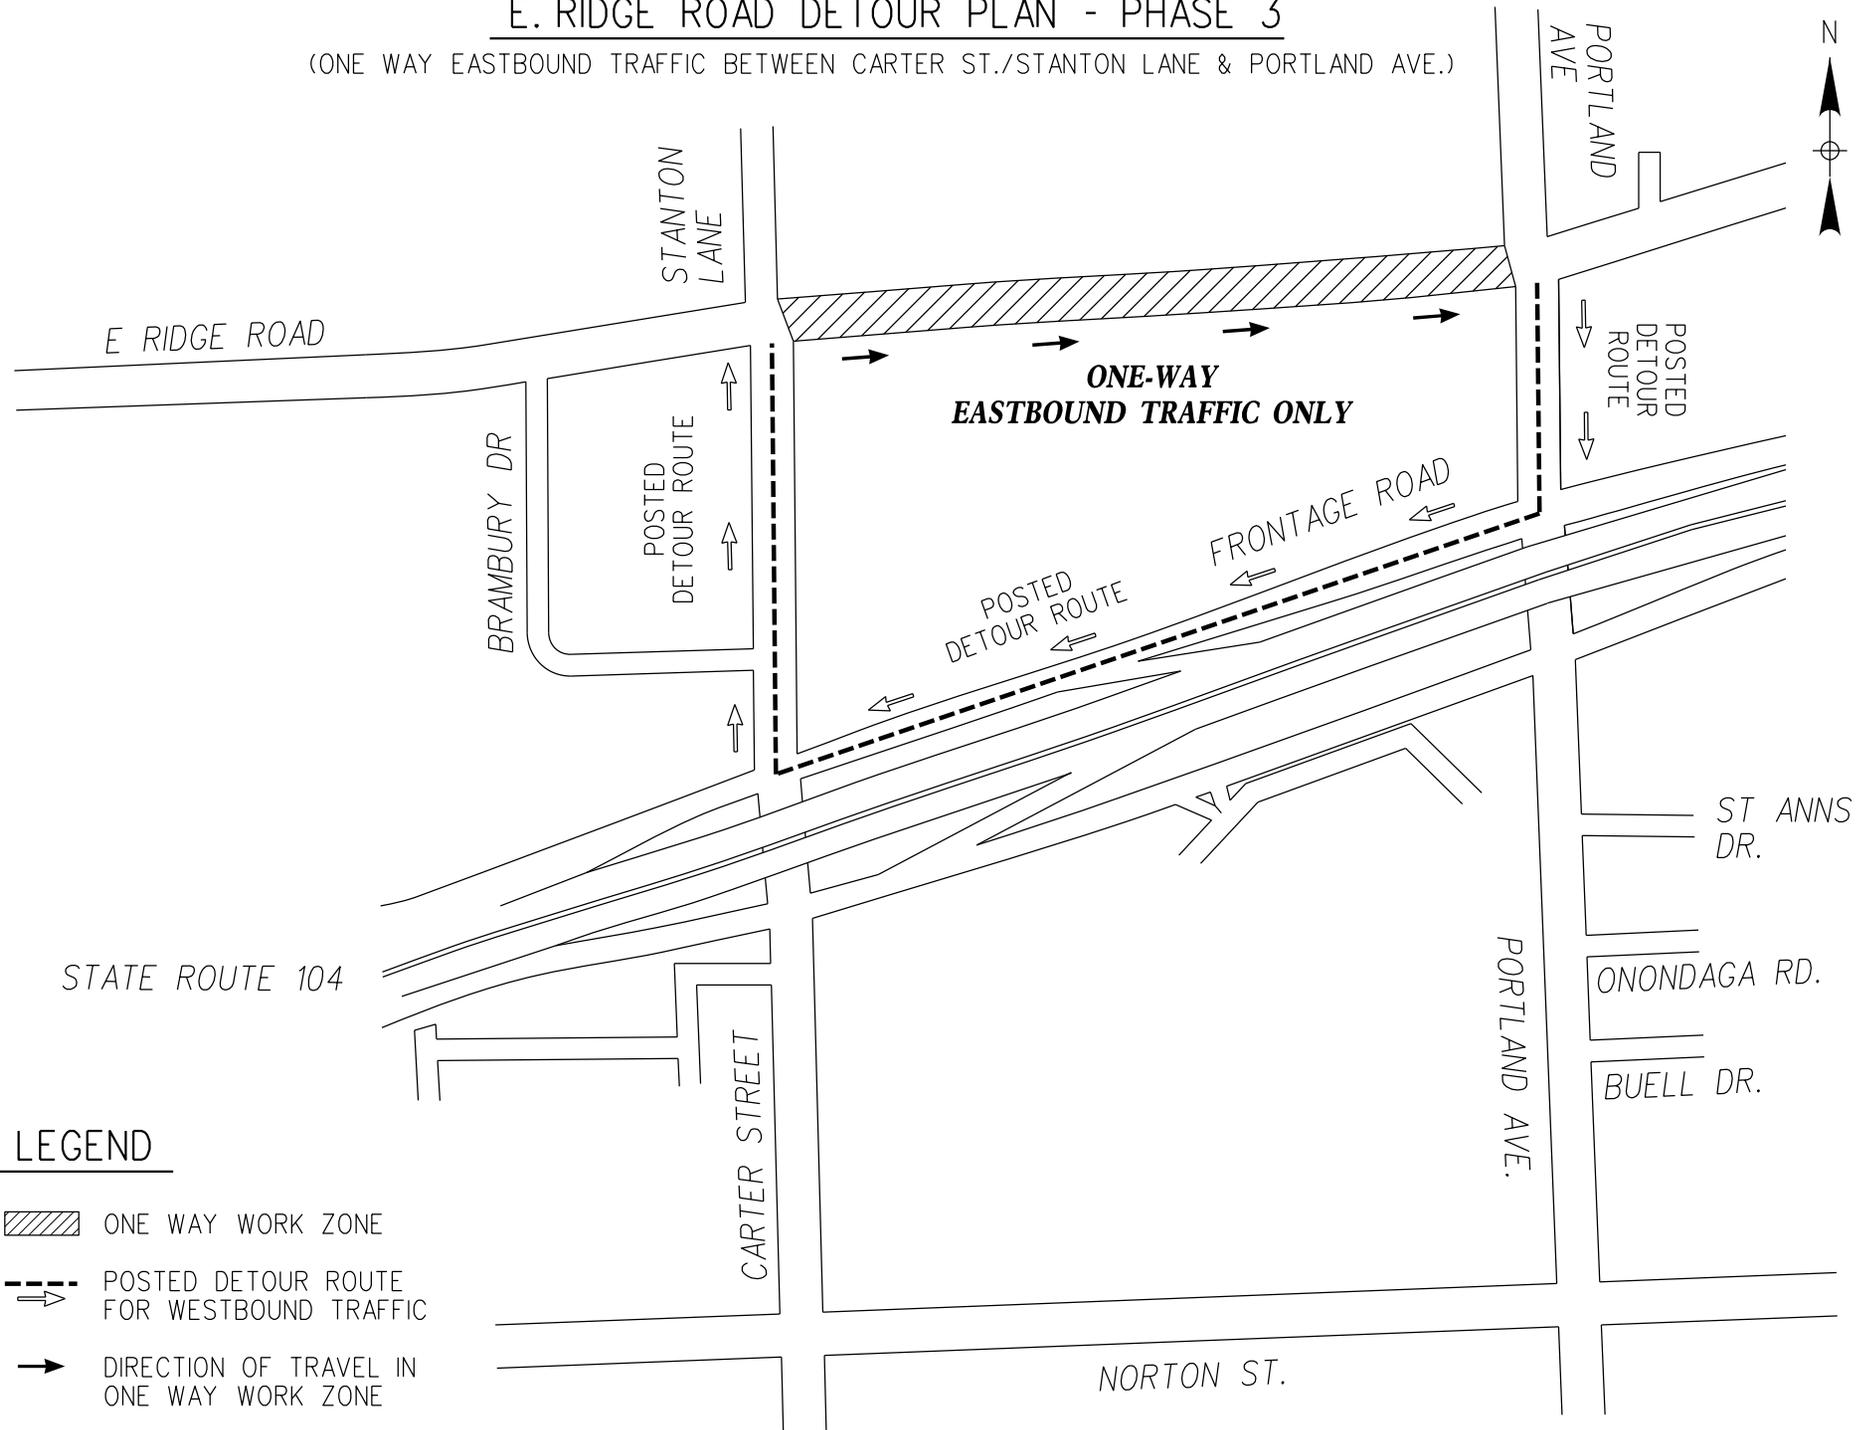

Full time inspection staff is on site daily working with the contractor. If you have an emergency, question or concern regarding the work in progress or other circumstance, please contact our Resident Engineer at the number below.
