Hon. Maggie Brooks
Monroe County Executive
110 County Office Building
39 West Main St.
Rochester, NY 14614

Dear County Executive Brooks:

The Town of Greece is pleased to join the effort by Monroe County to bring Google's "Fiber to the Home" broadband experiment to our community. I agree that this is an incredible opportunity. If selected as a test market the impact to the region, our economy and our citizens would be far-reaching.

There has been interest in this project from our residents, as well as our own research into the RFI here at town hall. Pooling our efforts and resources into the application process is a great way to present our community to Google. Greece is on-board and ready to assist in any way we can.

The competition for this award will be intense as the stakes are high. I know as a community we are up to both. That in addition to the data being collected, and the terrain and infrastructure that are under evaluation, Google and the greater Rochester area share a common bond - we both have always embraced innovation.

Hey Google – Take a good look at Monroe County! We are an outstanding candidate for this project. Our industry, our colleges, our medical facilities are world class and world renowned. I know we can work together as a community, and with Google, to bring the internet speed of the future to Monroe County today.

Sincerely,

John Auberger
Supervisor, Town of Greece
