Description of Duties:

This is a senior level position in the Medical Examiner's Office involving responsibility for supervising and participating in investigations of sudden and/or suspicious deaths during the evening and night shift. Employees of this class train new investigative personnel, perform body removals, and handle trace evidence. The work is performed under general supervision of and the employee reports directly to, the Chief Medical Investigator. Wide leeway is allowed for the exercise of independent judgment and on-the-scene medical/legal decision-making. The employee will be required to work shift work. Direct supervision is exercised over Medical Investigators.

Scope of Examination:

A multiple-choice written test will cover knowledge, skills and /or abilities in such areas as:

1. Evaluating information and evidence

These questions test for the ability to evaluate and draw conclusions from information and evidence. Each question consists of a set of facts and a conclusion based on the facts. The candidate must decide if the conclusion is warranted by the facts.

2. Forensic investigative methods and practices

These questions test your knowledge of modern forensic investigative methods and practices.

3. Preparing written material

These questions test for the ability to present information clearly and accurately, and to organize paragraphs logically and comprehensibly. For some questions, you will be given information in two or three sentences followed by four restatements of the information. You must then choose the best version. For other questions, you will be given paragraphs with their sentences out of order. You must then choose, from four suggestions, the best order for the sentences.

4. Supervision

These questions test for knowledge of the principles and practices employed in planning, organizing, and controlling the activities of a work unit toward predetermined objectives. The concepts covered, usually in a situational question format, include such topics as assigning and reviewing work; evaluating performance; maintaining work standards; motivating and developing subordinates; implementing procedural change; increasing efficiency; and dealing with problems of absenteeism, morale, and discipline.

5. Understanding and interpreting written material

These questions test how well you comprehend written material. You will be provided with brief reading selections and will be asked questions about the selections. All the information required to answer the questions will be presented in the selections; you will not be required to have any special knowledge relating to the subject areas of the selections.
