

ITEM 604.15M

**CLEANING EXISTING CATCH BASINS, MANHOLES, FIELD
INLETS AND DROP INLETS**

DESCRIPTION

Under this work, the CONTRACTOR shall clean and maintain the existing catch basins, manholes, field inlets, and drop inlets which are specified on the plans or directed by the ENGINEER.

MATERIALS

Not specified.

CONSTRUCTION DETAILS

All specified catch basins, manholes, field inlets, and drop inlets which lie within the construction area shall be cleared of silt and debris and maintained for the duration of this contract in a manner approved by the ENGINEER.

The CONTRACTOR shall provide necessary protection against damage to the existing structures.

METHOD OF MEASUREMENT

Cleaning existing catch basins, manholes, field inlets, and drop inlets shall be measured by the number actually cleaned and maintained.

BASIS OF PAYMENT

The unit price bid for each shall include all labor, materials and equipment necessary to clean and maintain existing catch basins, manholes, field inlets, and drop inlets. Only one payment will be made regardless of the number of times each catch basin, manhole, field inlet or drop inlet is cleaned or maintained.

Payment will be made under:
