Part 3 Determination of Significance

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

The Environmental Mapper indicates that the subject property, or an adjoining property is in an environmentally sensitive area, has been designated as sensitive for archaeological sites and contains a species of animal, or associated habitats listed as threatened or endangered

This action is for the acquisition of the property and does not include the physical alteration nor disturbance of the property. It is limited to the placement of road signs. Therefore, there this action will not result in any significant adverse environment impacts.
