### Short Environmental Assessment Form Part 3 Determination of Significance

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

The Environmental Mapper indicates that an adjoining property has been the subject of remediation. The parcel is approximately 640 feet from the site of the proposed action and will not be impacted. The Environmental Mapper also indicates the site is located in an archaeologically sensitive area, but after review and consultation through the NYS Culturally Resource Information System (CRIS) and NYS Office of Park, Recreation, and Historic Preservation (NYSORHP) the review is closed and will not impact any archaeologically sensitive areas. Accordingly, the proposed action will not result in any significant adverse environmental impacts.

<input type="checkbox"/>	Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.
<input checked="" type="checkbox"/>	Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action will not result in any significant adverse environmental impacts.
