**Part 2: Impact Assessment**

**Part 2 is to be completed by the County Legislative Body ("CLB") as Lead Agency.**

Answer all of the following questions in Part 2 using the information contained in Part 1 and other materials submitted to the CLB for the proposed modification, consolidation or termination of a county-adopted, State-certified agricultural district or otherwise available to the reviewer.

In providing responses to each of the questions, the reviewer should keep in mind that the action proposed is the modification, consolidation or termination of an agricultural district(s). The action is not the land use or activity which will, or may, take place in the district(s). For example, it is not appropriate to consider the effects of management actions that may be taken by individual operators in conducting farming. Agricultural farm management practices, including construction, maintenance and repair of farm buildings, and land use changes consistent with generally accepted principles of farming are listed as Type II actions in 6 NYCRR §617.5(c)(3), and these actions have been determined not to have a significant impact on the environment.

**Part 3: Determination of Significance**

For every question in Part 2 that was answered "moderate to large impact may occur," or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short term, long-term and cumulative impacts.

Seventeen parcels have been submitted for addition to the Monroe County Agricultural Districts, Western District #5 and Eastern District #6. These parcels are located throughout the County. The addition of each parcel is part of the annual addition period for the Monroe County Agricultural Districts. Accordingly, this will be reviewed as one action and all impacts, scope, and significance will be determined together.

The action taking place is the addition of parcels to an agricultural district, no physical construction or changes to the parcels are permitted by this action. Any such physical changes will be consistent with the existing regulations and zoning or will need to be permitted by the local municipality and undergo an environmental review at that time. The parcels being added to the Agricultural District are used for agricultural activities that reflect the current and historic character of the surrounding area and will remain the same through this action. They are not anticipated to change in character, attract people or traffic, impact existing water and waste water services.

One site was located near to, but not contiguous to State Superfund site 828063, which has subsequently been cleaned up. Accordingly, there are not impacts to the site from the State Superfund site. This action will not result in significant adverse impacts to on-site or nearby national or state register of historic places, or state eligible sites, or archaeological sites; wetlands or other regulated water-bodies; 100 year flood plain(s), or remediation sites.

<input type="checkbox"/>	Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.
<input checked="" type="checkbox"/>	Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action will not result in any significant adverse environmental impacts.
