Full Environmental Assessment Form
Part 2 - Identification of Potential Project Impacts

Agency Use Only [If applicable]
 Project : Crittenden Road Property Sale
 Date : 07/11/2023

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency **and** the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section.
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

Full Environmental Assessment Form

Part 3 - Evaluation of the Magnitude and Importance of Project Impacts and Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

This action is for the sale of 55 parcels totaling approximately 30+/- acres. This property sale is adjacent to, or substantially contiguous to, the Lehigh Valley Trail Ext. running north/south from the Erie Canal to the Monroe County owned Lehigh Valley Trail running east/west and the Town of Brighton's Lynch Woods Nature Park. Additionally, the Monroe County owned and managed Genesee Valley Park and Genesee Valley Golf Course is approximately 466+/- feet from this action.

On Part 2 of the FEAF, question #7 indicated that the proposed action may result in a loss of flora or fauna. Currently, these parcels are largely undeveloped. The sale of the parcels may result in development which may cause a loss of flora and fauna on site as the property "will potentially support future substation and transmission upgrades that are in development at this time." Substation and Transmission upgrades may result in clear cutting, filling, and ongoing maintenance to vegetation to the site. The site is not known to host: rare, threatened, or endangered species as listed by New York State or the federal government; any species of special concern or conservation need or any habitat used by the same, as listed by New York State or the federal government. Accordingly, it is not anticipated that any loss of flora or fauna will have no or small impact to the environment.

Question #7(d), Impact on Transportation indicated the proposed action may result in a change to existing transportation systems. The Lehigh Valley Trail Ext. is a non-motorized trail that connects cyclists, pedestrians, and hikers to portions of the City of Rochester and the Town's of Brighton and Henrietta. By connections to other existing trails or mixed use paths, users can connect with many Monroe County communities via the Erie Canal Trail, Lehigh Valley Trail, Auburn Trail, Lake Ontario State Parkway Trail, the Genesee Riverway Trail, the Genesee Greenway Trail, and others. Accordingly, "future substation and transmission upgrades that are in development at this time" may impact the user experience, due to temporary construction debris, delay, or permanent change due to land use changes from forested and early-successional vegetation to developed or commercial land uses. Although, this sale may lead to potential substation and transmission upgrades that may impact the Lehigh Valley Trail the impact is expected to be small and/or temporary in nature.

Question #17, Consistency with Community Plans indicated that the potential development of these parcels for commercial or industrial use is not consistent with the adopted land use plans of the Town of Brighton. The majority of parcels are currently zoned Residential Large Lot (RLL) and future land use maps from "Envision Brighton 2028 - Comprehensive Plan" identify that this area, potentially parcels a part of this sale are identified as Town Parks and Open Space. Specifically, question 17(g) indicates that the proposed action may induce secondary impacts such as clearing of trees and vegetation, access roads, and commercial development in an area currently zoned residential large lot and proposed in a future land use map as Town Parks and Open Space. Although the area is envisioned as Town Park and Open Space, substations and transmission lines for utilities are ubiquitous in Monroe County and the Town of Brighton and are often intermixed into residential, rural, suburban, and commercial land uses. The development of such, may have small impacts to the community and be inconsistent with community plans, however these impacts may be further ameliorated by buffers, barriers, and site design that allow utilities or industrial uses to fit in to existing land uses or be in close proximity to dissimilar land uses.

Determination of Significance - Type 1 and Unlisted Actions

SEQR Status: ☒ Type 1 ☐ Unlisted

Identify portions of EAF completed for this Project: ☒ Part 1 ☒ Part 2 ☒ Part 3

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the
Monroe County _____ as lead agency that:

☒ A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

☐ B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.7(d)).

☐ C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.
