### Short Environmental Assessment Form Part 3 Determination of Significance

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

The proposed construction of the 5,500 SF building additional to the existing Ames Building will not result in any significant adverse impacts, either individually or cumulatively. The proposed project is consistent with surrounding uses and will connect to existing public water and sewer systems, which have sufficient capacity to serve the project. Any storm water runoff will be directed to existing infrastructure. The project will comply with all applicable zoning, building, and permitting requirements. No point source discharges or permanent impoundments are proposed. Considering the small scale of disturbance and the temporary nature of construction impacts, there will be no significant impacts. Accordingly, this action will not result in any significant adverse environmental impacts.

- ☐ Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.
- ☒ Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action will not result in any significant adverse environmental impacts.
