Short Environmental Assessment Form Part 3 Determination of Significance

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

The proposed project Midvale Commons Phase 2, is the new construction of 28 senior (62+) apartments at 2770 Baird Road in the Town of Perinton. The site is located on the east side of Baird Road, just west and adjacent to Midvale Commons Phase 1. Development Plans involve the creation of 28 one-bedroom Bungalow-style units in eight one-story buildings. All apartments are planned to serve households earning up to 30%, 50%, and 60% of the Area Median income. This Project is the second and final phase of development on this site. The Monroe County Division of Community Development is providing CDBG funding to promote affordable rental housing options throughout Monroe County.

Based on review of the site, the project does not impact wetlands, the 100 year floodplain or any structures more than 50 years old. The project will not impact existing natural resources, wetlands, historical or cultural resources and will not alter the existing community character. The proposed action is consistent with existing land use. Accordingly, the proposed action will not result in any significant adverse environmental impacts.

<input type="checkbox"/>	Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.
