Subject: Classification of Action and Determination of Significance Pursuant to the State Environmental Quality Review Act for the Balinsky Gardens Project Funded Through the Monroe County Home Investments Partnerships (HOME) Program

Honorable Legislators:

I recommend that Your Honorable Body determine whether the Balinsky Gardens Project funded through the Monroe County Home Investment Partnerships ("HOME") Program may have a significant adverse impact on the environment pursuant to the State Environmental Quality Review Act ("SEQRA").

The proposed project involves the construction of a 104-unit, five-building multi-family residential development by Providence Housing, located on a 9.2-acre parcel situated behind 2590 Culver Road. The site is positioned along Culver Road in an area characterized by a mix of residential and commercial uses. The development will include 32 townhouse-style units, each offering three bedrooms, and 72 apartment-style units within a low-rise elevator building. The apartment building will feature 32 one-bedroom units and 40 two-bedroom units. The first floor of the elevator building will house various resident-focused amenities, including bicycle storage, resident service offices, leasing offices, maintenance facilities, and shared community space. Additional common areas will feature a community room with kitchenette, on-site laundry, a library, restrooms, secure package drop-off, and mechanical rooms. This project is funded through the Monroe County Home Investment Partnerships (HOME) Program, which aims to promote the creation of affordable rental housing options across Monroe County.

The Balinsky Gardens Project funded through the Monroe County Home Investment Partnerships (HOME) Program has been preliminarily classified as an Unlisted Action pursuant to 6 NYCRR § 617(b). The State Environmental Quality Review Act regulations found at 6 NYCRR Part 617 requires that no agency shall carry out or approve an Action until it has complied with the requirements of SEQRA.

The specific legislative actions required are:

1. Determine that Balinsky Gardens Project funded through the Monroe County Home Investment Partnerships Program is an Unlisted Action.

2. Make a determination of significance regarding the Balinsky Gardens Project funded through the Monroe County Home Investment Partnerships Program pursuant to 6 NYCRR § 617.7.
3. Authorize the County Executive, or his designee, to take such actions to comply with the requirements of SEQRA, including without limitation, the execution of documents and the filing, distribution and publication of the documents required under SEQRA, and any other actions to implement the intent of this resolution.

This determination will have no impact on the revenues or expenditures of the current Monroe County budget.

I recommend that this matter be referred to the appropriate committee(s) for favorable action by Your Honorable Body.

Sincerely,

Adam J. Bello
Monroe County Executive

PRINT FORM

Full Environmental Assessment Form
Part 2 - Identification of Potential Project Impacts

Agency Use Only (If applicable)
 Project: Pronghorn Housing 2500 Oliver Road
 Date:

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency and the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section.
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

Full Environmental Assessment Form **Part 3 - Evaluation of the Magnitude and Importance of Project Impacts** **and** **Determination of Significance**

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact.
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

Please see attachment.

Determination of Significance - Type 1 and Unlisted Actions

SEQR Status: ☐ Type 1 ☒ Unlisted

Identify portions of EAF completed for this Project: ☒ Part 1 ☒ Part 2 ☒ Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the
Town of Irondequoit Planning Board as lead agency that:

☒ A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

☐ B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.7(d)).

☐ C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.

Short Environmental Assessment Form Part 3 Determination of Significance

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

This proposed project is the construction of a 104 unit 5 building multi-family residential development by Providence housing. The subject property is a 9.2 acre site along Culver Rd. The site is a former landfill, is vacant and enrolled in the Brownfield Cleanup Program (BCP). Comprehensive investigative and remediation plans are in place to address contamination and site cleanup including a Remedial Action Work Plan (RAWP) pursuant to the BCP in New York State DEC regulations. As part of the BCP the applicant adheres to the RAWP protocols for the removal of contaminated soil in the design of a vapor medication system is part of the remediation process. Site remediation will be conducted under state regulations, ensuring that the contamination is addressed prior to site occupancy. The Monroe County Division of Community Development is providing CDBG funding to promote affordable rental housing options throughout Monroe County.

The 9.2 acre site is accessible through Culver Road and is in an area with a mix of residential and commercial uses. Rezoned from R1 to R5 residential it is currently vacant but was previously a landfill and agricultural market. The site contains undocumented fill material including construction debris up to 20 feet deep, primarily in former ravine. It was accepted into the Brownfield Cleanup Program in November 2023 as site number C828226. Hobby Creek lies 500 feet north with groundwater generally flowing northeast. A 2024 study found no wetlands, streams, or habitats for endangered species on the site. Based on review of the site, the project does not impact wetlands, the 100 year floodplain or any structures more than 50 years old. The project will not impact existing natural resources, wetlands, historical or cultural resources and will not alter the existing community character. The proposed action is consistent with existing land use. Accordingly, the proposed action will not result in any significant adverse environmental impacts.

- ☐ Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.
- ☒ Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action will not result in any significant adverse environmental impacts.
