 Part 3 Determination of Significance**

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

Part 1 of the EAF indicates that the site contains or is near wetlands and a floodplain. This action pertains solely to the sale of a tax foreclosed surplus property on Euler Road in the Town of Ogden. No wetlands or floodplains will be impacted by the sale itself. Any future development of the parcel will be subject to local zoning and building codes, as well as all applicable federal and New York State wetland and floodplain regulations.

Accordingly, no wetlands or floodplains will be impacted from this sale and the action will not result in any significant adverse environmental impacts.

<input type="checkbox"/> Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.
