**Full Environmental Assessment Form  
Part 1 - Project and Setting**

**Instructions for Completing Part 1**

**Part 1 is to be completed by the applicant or project sponsor.** Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification.

Complete Part I based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information; indicate whether missing information does not exist, or is not reasonably available to the sponsor; and, when possible, generally describe work or studies which would be necessary to update or fully develop that information.

Applicants/sponsors must complete all items in Sections A & B. In Sections C, D & E, most items contain an initial question that must be answered either "Yes" or "No". If the answer to the initial question is "Yes", complete the sub-questions that follow. If the answer to the initial question is "No", proceed to the next question. Section F allows the project sponsor to identify and attach any additional information. Section G requires the name and signature of the applicant or project sponsor to verify that the information contained in Part I is accurate and complete.

<b>Name of Action or Project:</b> Jail Mainframe Reconstruction Project		
<b>Project Location (describe, and attach a general location map):</b> 130 South Plymouth Avenue, Rochester, NY 14614		
<b>Brief Description of Proposed Action (include purpose or need):</b> <p>Many of the systems in the existing jail are original to the facility's construction and are over 45 years old, operating well beyond their life expectancy. There have also been recent changes in State Legislation such as bail reform, centralized arraignment and Raise the Age. These potential physical limitations and regulatory requirements, as well as recent public health issues such as COVID-19, in addition to a renewed national focus on social justice, drive the need to ensure that outdated facilities do not limit the Sheriff's and County's ability to adapt and align incarceration and criminal justice programming with contemporary and constantly evolving expectations.</p> <p>This project will progress through several phases, commencing with a pre-planning effort, which will assess physical and programmatic needs, population projections, and stakeholder requirements. Upon acceptance by the Sheriff's Office of a conceptual plan for Jail Mainframe Reconstruction, facilities, design, construction, commissioning and occupancy will occur. This phase of the project involves the development of a needs assessment, project definition, stakeholder engagement, an implementation plan, site review processes and preparation of conceptual plans.</p>

**Full Environmental Assessment Form**  
**Part 2 - Identification of Potential Project Impacts**

Agency Use Only (If applicable)

Project: \_\_\_\_\_

Date: \_\_\_\_\_

**Part 2 is to be completed by the lead agency.** Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency and the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

**Tips for completing Part 2:**

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section.
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

**Full Environmental Assessment Form**  
**Part 3 - Evaluation of the Magnitude and Importance of Project Impacts**  
**and**  
**Determination of Significance**

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

**Reasons Supporting This Determination:**

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

The project is anticipated to include replacing, rehabilitating, and/or reconstructing the jail mainframe, which is approximately 270,000 square feet, on the same site as the current jail mainframe. Based upon review and consideration of Parts 1 and 2 of the Full Environmental Assessment form, the New York State Cultural Resource Information System (CRIS), and City of Rochester zoning code and maps, this proposed action will not result in any significant adverse environmental impacts based on the following reasons.

First, if the jail mainframe is replaced and/or reconstructed, the construction may involve physically altering the land. However, this impact, if any, would be small because there is already a structure located on this site and the soil is previously disturbed urban fill. Alternatively, if the jail mainframe is rehabilitated, there will no impacts to land.

Second, although the site is located across the street from historic buildings and a historic district and is within an archaeological sensitive area (a designation which includes a majority of the City of Rochester), the Monroe County Civic Center was surveyed as part of the Rochester Historic Resources Survey: Southwest Quadrant & Downtown in 2019, which determined that the Civic Center is not eligible for listing on the New York State or National Registers of Historic Places. Moreover, the project site was previously disturbed, including during the construction of the current jail mainframe, and therefore is unlikely to yield archaeological resources. In the event archaeological resources are discovered during construction, however, construction will be suspended until any substantial adverse impact is avoided or mitigated.

Last, because the project is anticipated to include replacing, rehabilitating, and/or reconstructing the jail mainframe that is currently located on the site, the project will have small or no impacts on geological features, surface water, groundwater, flooding, air, plants and animals, agricultural resources, aesthetic resources, open space and recreation, critical environmental areas, transportation, energy, human health, and community plans/character. The project may have temporary impacts to noise, odor, and/or light during the construction period, but these impacts, if any, will be limited to typical construction hours and therefore will have a minor, if any, impact on the environment.

Monroe County as lead agency that:

☒ A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

☐ B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.7(d)).

☐ C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.

To The Honorable  
Monroe County Legislature  
407 County Office Building

**Subject:** Classification of Action, Designation of Lead Agency, and Determination of Significance, Pursuant to State Environmental Quality Review Act for Jail Mainframe Reconstruction Project

Honorable Legislators:

I recommend that Your Honorable Body designate Monroe County as Lead Agency for the Jail Mainframe Reconstruction Project and determine whether the action may have a significant adverse impact on the environment pursuant to the State Environmental Quality Review Act (SEQRA).

The jail mainframe was originally constructed in 1968 and is approximately 270,000 square feet. Many of the systems in the jail mainframe are original and beyond their useful life. There have also been recent changes in State Legislation such as bail reform, centralized arraignment and Raise the Age. These potential physical limitations and regulatory requirements, as well as recent public health issues such as COVID-19, in addition to a renewed national focus on social justice, drive the need to ensure that outdated facilities do not limit the ability of the Sheriff's Office to adapt and align incarceration and criminal justice programming with the changes in State Legislation.

This project will progress through several phases, commencing with a pre-planning effort, which will assess physical and programmatic needs, population projections, and stakeholder requirements. Upon acceptance by the Sheriff's Office of a conceptual plan for Jail Mainframe Reconstruction, facilities, design, construction, commissioning and occupancy will occur.

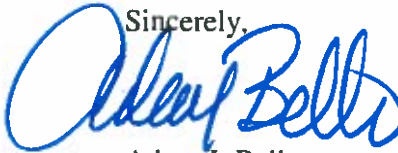

The Jail Mainframe Reconstruction Project has been preliminarily classified as a Type I action pursuant to 6 NYCRR § 617.4(b)(6)(iv). The SEQRA regulations found at 6 NYCRR Part 617 requires that no agency shall carry out or approve an Action until it has complied with the requirements of SEQRA.

**The specific legislative actions required are:**

1. Determine that the Jail Mainframe Reconstruction Project is a Type I Action.
2. Designate Monroe County as Lead Agency for a coordinated review of the Jail Mainframe Reconstruction Project.
3. Make a determination of significance of the Jail Mainframe Reconstruction Project pursuant to 6 NYCRR § 617.7.
4. Authorize the County Executive, or his designee, to take such actions to comply with the requirements of the State Environmental Quality Review Act, including without limitation, the execution of documents and the filing, distribution and publication of the documents required under the State Environmental Quality Review Act, and any other actions to implement the intent of this resolution

This designation will have no impact on the revenues or expenditures of the current Monroe County budget.

I recommend that this matter be referred to the appropriate committee(s) for favorable action by Your Honorable Body.

Sincerely,  

Adam J. Bello  
Monroe County Executive
