Short Environmental Assessment Form Part 3 Determination of Significance

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

The action is for the repair and replacement of the culvert located at the property. and does not include the physical alteration nor disturbance of the property. Although Part 1 of the EAF indicates wetlands exist in the area, according to a review of state and federal wetland maps, no wetlands are near the project site. Therefore, no wetlands will be impacted or encroached upon with this project and any future use of the property will need to be reviewed and consistent with the current zoning code and permitting requirements for Wetlands from state and federal regulatory bodies.

The proposed site or adjoining area also were the subject of remediation for hazardous waste. The proposed action does not include physical alteration of the site nor disturbance of the property. It has been determined that no significant adverse environmental impacts from this action will occur.

- ☐ Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.
- ☒ Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action will not result in any significant adverse environmental impacts.

Short Environmental Assessment Form Part 3 Determination of Significance

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

The action is for the repair and replacement of the culvert located at the property, and does not include the physical alteration nor disturbance of the property. Although Part 1 of the EAF indicates wetlands exist in the area, according to a review of state and federal wetland maps, no wetlands are near the project site. Therefore, no wetlands will be impacted or encroached upon with this project and any future use of the property will need to be reviewed and consistent with the current zoning code and permitting requirements for Wetlands from state and federal regulatory bodies.

The proposed site or adjoining area also were the subject of remediation for hazardous waste. The proposed action does not include physical alteration of the site nor disturbance of the property. It has been determined that no significant adverse environmental impacts from this action will occur.

- ☐ Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.
- ☒ Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action will not result in any significant adverse environmental impacts.
