 Part 3 Determination of Significance**

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

Part 1 of the EAF indicates that the site contains or is near wetlands and a remediation site. This action pertains solely to the acquisition of easements necessary to replace the culvert on Peck Road. No wetlands or remediation site will be impacted by the acquisition itself. Any future development will be subject to local zoning and building codes, as well as all applicable federal and New York State wetland regulations.

The Trimmer Road Landfill remediation site is listed under the State Superfund Program and is located approximately 2,600 feet south of the project. Remediation at this site has been completed.

Accordingly, no wetlands or remediation site will be impacted from this acquisition and the action will not result in any significant adverse environmental impacts.

Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.

Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action will not result in any significant adverse environmental impacts.
