

Monroe County
Department of Transportation
Presents
Replacement of
Attridge Road Culvert over
Black Creek

Town of Riga, Monroe County

Project Description:

The project proposes to replace the culvert that carries Attridge Road over Black Creek in the Town of Riga. The project corridor begins approximately 131-ft. west of the existing culvert and extends to approximately 141-ft. east of the existing culvert for a total project corridor length of 272-ft.

Existing Culvert:

- Original construction date is unknown.
- Widened in 1955 for the widening of Attridge Road.
- Cast-in-place concrete three-sided culvert
- 12'-6" by 7'-4" opening.

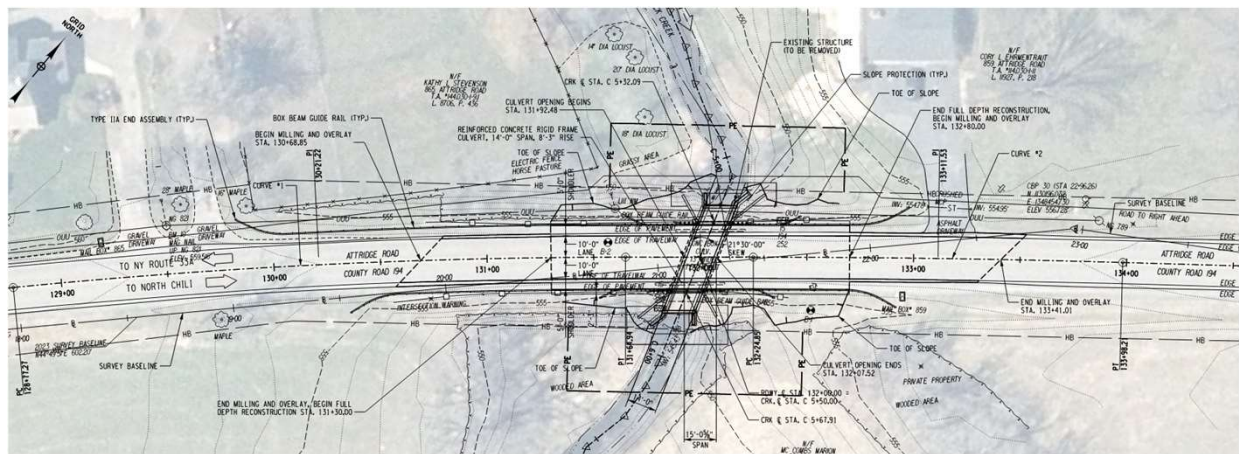

Project Objective:

Address structural, geometric and hydraulic deficiencies to meet current standards. Also, improve pedestrian and bicycle accommodations across the structure.

Proposed Alternative: Culvert Replacement

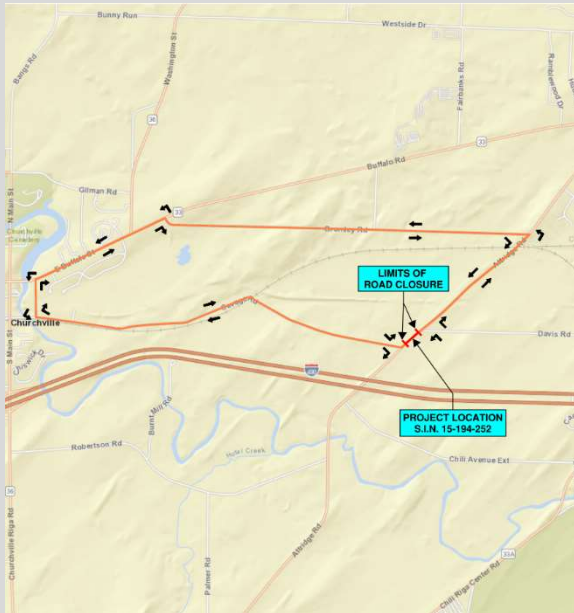

The proposed alternative includes the following features:

- Complete removal of the existing culvert.
- Installation of a new precast three-sided concrete culvert with 14'-0" span structure.
- Installation of precast concrete wingwalls at each corner of the culvert.
- Placement of stone fill slope protection at the inlet and outlet of the culvert for prevention of erosion and scour.
- Full reconstruction 150-ft. of road at the location of the new culvert consisting of 10-ft. travel lanes and 5-ft. shoulders.
- Mill and resurface 60-ft. of road at each end of the reconstructed road section consisting of 10-ft. travel lanes and shoulders matching the existing.
- Installation of new box-beam guide rail.
- Construction of drainage improvements along the corridor.

Maintenance & Protection of Traffic:

- The project will require closure of Attridge Road at the project limits.
- Traffic will follow an off-site detour for the duration of construction.
- The detour will be approximately 5.9 miles long.

Right of Way:

- The acquisition of Easements along portions of the properties adjacent will be required.
- The easements will be needed for construction of the culvert and for future maintenance of the culvert.
- Affected property owners will be contacted during final design.

Schedule:

- Preliminary Design – Ongoing
- Final Design – Completion in Fall 2024
- Construction Bidding – Winter of 2024
- Construction – 2025 (Expected 4-month duration)

Funding:

The project is being solely funded by Monroe County.

Comments, Questions & Concerns:
