

E-CIGARETTES, VAPE DEVICES & E-LIQUIDS

**E-CIGARETTES / VAPE DEVICES / E-LIQUIDS
ARE HAZARDOUS WASTE**

DO NOT PLACE IN TRASH OR RECYCLING BINS

DO NOT REMOVE BATTERIES

Place in plastic zip-type bag

BRING TO ecopark -- NO APPOINTMENT NECESSARY

ecopark HOURS OF OPERATION

Wednesday..... 1pm - 6:30pm

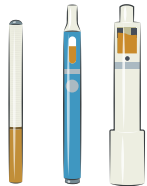

Saturday..... 7:30am - 1pm

(Closed on Holidays)

10 Avion Drive Rochester, NY 14624

• **E-Cigarettes:**

Disposable, Prefilled or Refillable - No tank or pod
Cartridge attached to pen containing battery

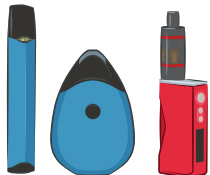

• **Tanks / Mods:**

Designed for multiple uses
Can be filled with different substances and
modified to vary voltage

• **Pod Mods:**

E-cigarette or vaping device with prefilled
OR refillable pod,
OR pod cartridge with modifiable pod system;
Come in many sizes, shapes, colors
Compatible prefilled pod cartridges that
contain nicotine, THC, or CBD –
with or without flavors

• **E-Liquids:**

Also known as vape liquid or vape juice,
typically contains a blend of propylene glycol,
vegetable glycerine, flavorings and nicotine or cannabinoids.

FREQUENTLY ASKED QUESTIONS

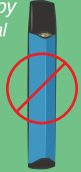

Q | Why is it important that I properly dispose of e-cigarettes, vaping devices and e-liquids?

A | *Simply tossing these devices or containers into the trash or recycling bin when finished can have serious consequences for human health and the environment:*

- Most e-cigarettes and vaping devices are powered by lithium-ion batteries. Under pressure, heat and/or physical perforation, these batteries can ignite and cause fires in trash and recycling bins, which present major hazards for truck operators, recycling facilities and landfills.

- Lithium-ion batteries contain lithium, cobalt, carbon and graphite, as well as electrolyte fluid and solvents, which can poison soil and waterways and endanger human and animal health.

- Nicotine is classified as an acute hazardous waste and can lead to unintentional exposure and accidental poisoning.

Q | How should I handle and store these devices?

A | - Do NOT rinse spent cartridges to remove residue.

- Handle used and spent cartridges carefully to avoid unintentional exposure. Some products can be dangerous and deadly if ingested or absorbed through the skin.

- Store all items in a cool, temperature controlled environment in a sealed container that is clearly labelled. A zip-type bag is acceptable for residential disposal. Deliver the container promptly to the ecopark.

- Always keep devices, cartridges, pods and bottles out of the reach of children.

- If a device battery begins smoking, immerse in water immediately and properly dispose as soon as possible.

Q | Are there additional programs available for disposal?

A | *Many manufacturers will accept used devices.*

Find the contact details for the manufacturer and ask how products should be packaged for return.

Q | How should institutions with a quantity of devices arrange for proper disposal?

A | *Schools, universities and other organizations that have a large quantity of e-cigarettes and vaping devices should utilize the Monroe County / WM ecopark's Conditionally Exempt Small Quantity Generator Program (CESQG).*
