Guidelines for Mixed Recycling at the  
Monroe County Recycling Center

Updated 4/2025

This document is regularly updated. In the interest of waste reduction, we suggest that you do not print this guide.

## Mixed Recycling at the Monroe County Recycling Center

For over 30 years, Monroe County residents have enjoyed a progressive and convenient curbside recycling program. As is its charge from the County, Waste Management, Inc., the Monroe County Recycling Center's (MCRC) contract operator, examines the waste stream for sustainable recovery opportunities. In 2014, the MCRC started to accept Mixed Recycling materials from its recycling collector customers. **Mixed Recycling means that paper materials no longer need to be separated from containers—all acceptable items can be mixed together.**

The MCRC's ability to process Mixed Recycling has enabled the collection of recyclables in a one bin system, including the transition to rolling recycling carts provided by several local municipal and private collection companies. The benefits of Mixed Recycling include cost effective collection with a compaction truck, reduced transportation impacts, increased convenience for residents, and often increased recycling rates.

One of the primary challenges with Mixed Recycling is increased **contamination**: the amount of non-recyclable materials that are put into recycle bins and ultimately disposed. To that end, Monroe County has compiled its Recyclopedia as a guide for residents to determine whether or not everyday items are acceptable for curbside recycling.

**Some recycling collection companies are not customers of the MCRC. Residential customers should contact their collection company to confirm what is accepted and how recycling bins should be prepared.**

## Recyclopedia Layout

The first section of the Recyclopedia identifies the paper, plastic, metal and glass items that are recyclable curbside and instructions on how to properly prepare these materials for collection. **Recyclables should always be EMPTY, CLEAN, and UNBAGGED.**

The second section of the Recyclopedia highlights common items that are not acceptable in the Mixed Recycling program through the MCRC, how to prepare appropriate items for disposal, and whether there is an alternative option (reuse, donation, composting, store drop offs, mail in programs etc.)

In 2011, Monroe County and Waste Management partnered to create the **ecopark**, a one-of-a-kind drop off for hard to handle recyclables for *Monroe County residents*. Located at 10 Avion Drive in the Town of Chili, the facility is open on Wednesdays from 1:00 p.m. to 6:30 p.m. and on Saturdays from 7:30 a.m. to 1:00 p.m. For a full list of acceptable items, associated fees and necessary appointments, please visit [www.ecoparkmchny.com](http://www.ecoparkmchny.com). The Recyclopedia also identifies items that are acceptable at the **ecopark**.
