

HINCHEY ROAD REHABILITATION PROJECT (PIXLEY ROAD TO CHILI AVE)

JUNE 2021

This informational newsletter will provide periodic updates (as needed) on the status of the Hinchey Road Rehabilitation Project and communicate upcoming construction activities to local residents.

CURRENT PROJECT STATUS

DESIGN REVISIONS AND CHANGES TO CONSTRUCTION YEAR

Monroe County Department of Transportation and its consultant, LaBella Associates, have revised the proposed design for the Hinchey Road Rehabilitation Project.

The original design, which was shared with the public in February 2021, featured curbing and closed drainage along the entire length of Hinchey Road. The curbing has now been eliminated from the majority of the road and the drainage design has been revised to consist of a closed system (storm sewer) on a small portion of the road, and an open (ditch/swale) system on the remainder. This change in drainage design was made because there are limited opportunities to outlet a closed system, due to the flat terrain and limited amount of discharge points

Installation of 6' wide asphalt shoulders, milling and re-paving of the existing pavement, replacement of existing sidewalk ramps, installation of pavement markings, and minor traffic signal work are all still being incorporated into the project.

The project design is still progressing, but, due to budget-constraints, **construction has been pushed back to 2023**. Additional information regarding the project, including a revised aerial plan view of the proposed improvements, can be viewed on the Monroe County DOT website:

<https://www2.monroecounty.gov/dot-construction>

Should you have questions or comments regarding this project, or if you would like to set up an on-site meeting to discuss the proposed work on your property, you may contact Tim Harris at 585-753-7747; email at timothyharris@monroecounty.gov.

PROJECT CONTACTS

Contract information for the project design team is below. A follow-up newsletter will be sent out prior to the start of construction with additional contact information for the contractor and the on-site Resident Engineer.
