**RE: English Road Culvert Replacements**

Dear Neighbor:

Beginning later this month, a contractor for the Monroe County Department of Transportation, Ramsey Constructors, will be replacing two culverts located on English Road, between Long Pond Road and Fetzner Road. A public meeting for this project was held in February of 2020, where public input was gathered and incorporated into the final design of the project, where appropriate.

The first culvert is located 500' east of Long Pond Road, while the other is located just east of the intersection of Old English Drive and English Road (approximately 950' west of Fetzner Road). Work on the culvert closer to Long Pond Road is anticipated to begin on or around Monday, March 28, 2022. A full road closure, with offsite detour, is necessary to complete this work. The closure is anticipated to begin on or about April 8, 2022. Detour signs and electronic message boards will be posted prior to the road closure. A map of the proposed detour route has been included on the back of this letter.. Note that local traffic will be maintained for all residential properties, but that no access will be permitted across the culvert which is under construction.

Once work is completed on the western culvert near 1677 English Road, the roadway over the new culvert will be re-opened, and the contractor will move to the Old English Road/English Road location to replace that structure. This will also require the roadway be closed, and modifications to the detour will be made at that time.

Overall the project is anticipated to be completed in the fall of 2022. We apologize for any inconvenience this work may cause, and ask for your patience during the project's duration. If any questions or concerns arise during construction, please contact me at 585-753-7747 or by email [timothyharris@monroecounty.gov](mailto:timothyharris@monroecounty.gov).

Project updates will be available on our website: [www.monroecounty.gov/dot-construction](http://www.monroecounty.gov/dot-construction)

Sincerely,

Tim Harris, P.E.  
Transportation Project Manager
