

CONSTRUCTION GUIDELINES

1. GEOTEXTILE SHALL HAVE AN EDS OF 40-85. BURLAP MAY BE USED FOR SHORT TERM APPLICATIONS.
2. CUT GEOTEXTILE FROM A CONTINUOUS ROLL TO ELIMINATE JOINTS. IF JOINTS ARE NEEDED THEY WILL BE OVERLAPPED TO THE NEXT POST (TYP.).
3. POST MATERIALS WILL BE STANDARD 2" x 4" HARDWOOD OR EQUIVALENT METAL.
4. FRAMES SHALL BE CONSTRUCTED TO FIT AROUND EXISTING STRUCTURES AS SHOWN.
5. GEOTEXTILE SHALL BE EMBEDDED 6" MINIMUM BELOW GROUND AND BACKFILLED. IT SHALL BE SECURELY FASTENED TO THE POSTS AND FRAME.
6. A 2" x 4" WOOD FRAME SHALL BE COMPLETED AROUND THE CREST OF THE GEOTEXTILE FOR OVER FLOW STABILITY.
7. DRAINAGE AREA IS 1 ac.
8. A MCDOT APPROVED PRE-MANUFACTURED UNIT MAY BE SUBSTITUTED.
