

MONROE COUNTY EARLY INTERVENTION PROGRAM (MCEIP)

SELECTING YOUR ONGOING SERVICE COORDINATOR

Choosing an Ongoing Service Coordinator (OSC) is an important decision. The OSC works with an Early Intervention Official Designee (EIOD) who is responsible for overseeing the Individualized Family Service Plan (IFSP) for the purpose of ensuring that the plan complies with New York State Department of Health (NYSDOH) regulations and is congruent with the MCEIP and NYSDOH philosophy and policy.

All OSCs maintain a collaborative relationship with the Monroe County Department of Health and attend common training provided by them. Your OSC has various responsibilities, including the implementation, review and adjustment of the IFSP, and the coordination of providers responsible for the delivery of the services as stated in the IFSP. Your ongoing service coordinator will provide you with support as you negotiate the Early Intervention Program, and with your permission (if your child remains eligible for services), assist with transitioning your child into the school district.

Communication with the OSC about your concerns and needs is a crucial component of the Program. The OSC will be working closely with your family and providers to ensure that identified needs are being met. These needs can be related to Early Intervention or require a referral to another community resource.

Ongoing Service Coordinator contracted agencies
