## **Monroe County Department of Public Health is investigating potential exposures to COVID-19 after patron at BluHorn Tequilaria in Pittsford tests positive**

The Monroe County Department of Public Health is urging anyone who was at the BluHorn Tequilaria, 9 Main St. in Pittsford, on Friday, October 16 between 7 p.m. and 8:30 p.m. to contact MCDPH by calling (585) 753-5555 or emailing [COVID19@monroecounty.gov](mailto:COVID19@monroecounty.gov).

A patron who reports being closer than six feet to others for an extended time while not wearing a mask has tested positive for COVID-19.

Individuals who were at the establishment during that time should immediately self-quarantine and get tested for COVID-19. They should also be alert for symptoms of COVID-19, including fever or chills, cough, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, or diarrhea. These symptoms may occur up to 14 days after contact with the infected individual. If any of these symptoms appear, individuals should consult with their primary care provider.

For more information on how to quarantine or get tested for COVID-19, please contact the Monroe County COVID-19 Hotline at (585)753-5555 or email [COVID19@monroecounty.gov](mailto:COVID19@monroecounty.gov).
