BE IT RESOLVED BY THE AFFIRMATIVE VOTE OF NOT LESS THAN TWO-THIRDS OF THE TOTAL VOTING STRENGTH OF THE LEGISLATURE OF THE COUNTY OF MONROE, as follows:

Section 1. For the object or purpose of financing the cost of the Monroe Community College Wolk Health Care Center Project, in and for the County of Monroe, New York (the "County"), consisting of the design and renovation of existing space in the MCC Downtown Campus to expand instructional and lab space and multifunction space for health care education, there are hereby authorized to be issued \$2,500,000 bonds of the County, pursuant to the provisions of the Local Finance Law. The duly adopted current Capital Budget of the County, to the extent inconsistent herewith, is hereby amended to provide for the appropriation of the amount hereby authorized to pay the cost of the aforesaid specific object or purpose. The period of probable usefulness of the aforesaid specific object or purpose is twenty-five (25) years, pursuant to subdivision 12(a)(1) of paragraph a of Section 11.00 of the Local Finance Law.

Section 2. The maximum estimated cost thereof is \$2,500,000, and the plan for the financing thereof is by the issuance of \$2,500,000 bonds of said County herein authorized; provided, however, that to the extent any state and/or federal aid and/or grant and/or gift is received for the aforesaid purpose, the County Executive, or his designee, is hereby authorized to accept and shall use such funds to redeem any outstanding indebtedness incurred for such purpose or apply it, dollar for dollar, to reduce the amount of bonds to be issued for such purpose.

Section 3. The faith and credit of the County are hereby irrevocably pledged for the payment of the principal of and interest on such obligations as the same respectively become due and payable. - 1) such obligations are authorized for an object or purpose for which said County is not authorized to expend money, or
- 2) the provisions of law which should be complied with at the date of publication of this resolution are not substantially complied with, and
an action, suit or proceeding contesting such validity is commenced within twenty (20) days after the date of such publication, or

Full Environmental Assessment Form
Part 2 - Identification of Potential Project Impacts

11.15
 Agency Use Only [If applicable]
 Project: _____
 Date: _____

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency and the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section.
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

Part 3 - Evaluation of the Magnitude and Importance of Project Impacts
and
Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

Identify portions of EAF completed for this Project: Part 1 Part 2 Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the _____ as lead agency that:

A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.7(d)).

C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.

Seneca Park Zoo Improvements
SEQRA Negative Declaration – AMENDED
Reasons to Support Determination of Significance

This Document identifies updates to the Proposed Action for the Seneca Park Zoo Capital Improvement Program along with any corresponding changes from the 2016 environmental review SEQRA process in which a Negative Declaration was issued. Changes to the Lead Agency's environmental assessment of the Proposed Action are noted below, including any potentially significant environmental impacts associated with the updates or changes as a result of the refinement and details developed for Phase 2 of the Capital Program.

1. Impact on Land

Phase 1 of the Capital Program included the demolition of the Main Zoo Building as well as other minor accessory structures. Phase 2 will involve demolition of the remaining buildings at the main entrance, including the Administration building.

Phase 2 of the work at Seneca Park Zoo entails the demolition of the remaining administrative and support buildings at the main entrance and replacement with a new entrance building that will include administrative, support, and community spaces, as well as new, state of the art exhibit space, in line with the 2015 Zoo Master Plan.

The existing eastern service road will be widened to maintain appropriate fire department access route through the Zoo but shifted east. The roadway shift will also allow for the ability to isolate Zoo patron access from Zoo operational needs. The existing public access walking path along the eastern boundary of the Park will be shifted east also and be adjacent to the Zoo perimeter fence and still within the confines of the existing abandoned railroad bed. A vegetated buffer will still remain along the eastern Park boundary, offset a minimum of 5 feet from the Park property line.

This eastern service road will also be extended north from its existing terminus to the southern terminus of the new African exhibit to provide the Zoo with service access throughout the Zoo, reducing Zoo operational traffic within Seneca Park and provide fire department access through the entire Zoo.

The paved portion of the existing walking trail south of the Zoo's Main Parking Lot will be widened to allow for temporary use as a construction haul road during construction. This haul road will significantly reduce construction traffic within the Main Zoo parking lot, a significant safety improvement. This roadway will be restored upon completion of construction activities and repaved back to its original width.

Phase 2 will also involve the installation of a geothermal wellfield within the northern portion of the main parking lot. Approximately thirty vertical wells will be drilled within the parking lot area. Upon completion the well will be paved over and integral to the Zoo's heating and cooling needs.

A short section of the Zoo perimeter chain link fence, approximately 300 feet, will be replaced with a retaining wall which will range between three feet and 10-½ feet in height. Trees adjacent to the wall will be removed to accommodate construction.

Although this proposed work will result in changes to the land, for the above reasons no significant adverse environmental impacts to land resources are anticipated.

2. Impact on Geological Features

No noted geological features exist on the site; therefore, no significant adverse environmental impacts are anticipated.

3. Impact on Surface Water

None of the proposed Phase 2 work will encroach into any federal or State jurisdictional wetlands or surface water. The existing Trout Pond was expanded as part of Phase 1 incorporating the stormwater quantity needs of the proposed Phase 2 work. All stormwater quality and quantity requirements will be managed in accordance with NYSDEC requirements. For all elements of Phase 2, proper erosion and stormwater prevention controls will be required in accordance with a Stormwater Pollution and Prevention Plan (SWPPP). For these reasons, no significant adverse environmental impacts to surface waters are anticipated.

4. Impact on Groundwater

There will be no significant increase in impervious surface in Phase 2 that was not accounted for in Phase 1 with the expansion of Trout Pond. Existing groundwater infiltration areas will remain along the eastern portion of the park boundary.

All geothermal wells will be drilled and grouted in conformance with standard geothermal drilling practices and operations, and done in accordance with NYSDEC requirements. Therefore, no significant adverse environmental impacts to groundwater are anticipated.

5. Impact on Flooding

There are no designated floodplains within the Zoo boundary. Therefore, no significant adverse environmental impacts as a result of any flooding are anticipated.

6. Impact on Air

The continued operation of the Zoo does not produce any significant air emissions. The only minimal emissions would be from small-scale HVAC equipment or emergency generators.

There will be short-term temporary emissions during the Phase 2 construction process. Fugitive dust and exhaust from construction equipment can be expected but limited to the

immediate site and controlled through the use of appropriate construction practices. For these reasons, no significant adverse environmental impacts to air are anticipated.

7. Impact on Plants and Animals

NYS Natural Heritage (NYS NHP) and US Fish and Wildlife Service was consulted during Phase 1 to identify the potential for threatened or endangered species. Historical State records indicated that the potential presence of two plant species (purple bluets and Handsome sedge) may exist in the vicinity the Proposed Action, though they have not been observed since 1905 and 1921, respectively. Further consultation with NYS NHP during the Phase 1 SEQRA process determined that any proposed site disturbance in the Zoo and Park will not occur within habitat supporting either species.

Phase 2 work is proposed along the existing, abandoned railroad bed, which is bordered by trees. Additionally, there are several trees within the construction footprint that will be removed during construction activities within the Zoo boundary. Any trees removed for temporary haul road construction within the Seneca park boundary will be replaced with new trees.

For these reasons, no significant adverse environmental impacts to plants and animals are anticipated.

8. Impact on Agricultural Resources

There are no designated agricultural lands within the proposed development area. Therefore, no significant adverse environmental impacts to agricultural resources are anticipated.

9. Impact on Aesthetic Resources

The project has been designed to fit aesthetically with other buildings in the Zoo as well as the adjacent Seneca Park. As noted in item #10 below, the State Historic Preservation Office (SHPO) and the Landmark Society of Western New York (LSWNY) have been consulted with during Phase 1 and their concerns addressed to ensure that buildings and landscaping contribute to the aesthetic value of the Zoo and Seneca Park. Therefore, no significant adverse environmental impacts to aesthetic resources are anticipated.

10. Impact on Historic and Archeological Resources

Seneca Park East and West is noted as being on the National Register (03NR050522) and several of the buildings within the Zoo are noted as being or contributing historic structures, including the Main Zoo and Administration Buildings. As part of the environmental review process, SHPO was consulted and provided significant information regarding proposed work and past/current planning for the Zoo (16PR02924). The agency determined that the demolition of the buildings constituted as Adverse Impact in a consolidated response dated June 14, 2016 and requested additional information as

part of its review. The County consulted with the Landmark Society of Western New York (LSWNY) to provide an analysis and recommendations on the effected buildings due to their significant past history with Seneca Park and the Zoo.

With additional information provided to SHPO, the agency accepted that there are no Prudent or Feasible Alternatives to the demolition of the aforementioned buildings in a consolidated response dated October 28, 2016. SHPO identified measures to satisfy the potential historic impacts associated with demolition, which include photographic documentation of both buildings (completed prior to Phase 1) and incorporation of an interpretive display of the history of the Zoo that includes the buildings (proposed to be incorporated within Phase 2).

The proposed retaining wall to replace the existing chain link fence on the western property line will be coordinated with SHPO and LSWNY to ensure appropriate materials are chosen to minimize visual impacts as well as the planting of additional trees where feasible. This continued consultation and coordination provides important historical and cultural oversight. For these reasons, no significant adverse environmental impacts to historic and archeological resources are anticipated.

11. Impact on Open Space and Recreation

Development within the Zoo will occur within areas that are currently fully developed. Throughout the planning history of the Zoo, all lands within its bounds were identified as being utilized for potential expansion of animal exhibits and community education. Overall, the proposed improvements at the Zoo will not result in a loss of any recreational opportunities, rather it will expand these opportunities to the public and provide users with a more enjoyable experience through enhancement of pedestrian footpaths and Zoo educational experience.

The proposed temporary haul road on the southeastern portion of the existing, abandoned railbed will be temporary and utilized to separate construction truck traffic from visitor traffic, allowing the Zoo to continue to operate throughout the season. The service road extension will also allow the Zoo to continue to operate and will also provide more enhanced use of the existing public trail located along the former railroad grade.

The proposed improvements at the Zoo will have insignificant impacts to the Park, limited only to the replacement of the existing chain link fence with a stone retaining wall and minimal, strategic clearing of some buffer vegetation to accommodate the service road and trail system. Areas where this clearing is proposed is limited to the immediate area adjacent to the wall and haul road, and to the minimal extent necessary for construction; with new native trees planted to the extent practical. Therefore, no significant adverse environmental impacts to open space and recreation are anticipated.

12. Impact on Critical Environmental Areas

The City of Rochester designated their Open Space (O-S) Zoning Districts as Critical Environmental Areas (CEAs) in order to protect existing greenspace and recreational

assets within the City. The Zoo is within this zoning district and as such within a CEA. However, while there is significant work proposed within the CEA, the project will be within the currently developed Zoo boundary with proposed improvements designed to modernize and enhance original facility carrying it forward into the future. Therefore, no significant adverse environmental impacts to critical environmental areas are anticipated.

13. Impact on Transportation

The existing parking lot on the south end of the Zoo grounds will remain with some reconfigurations proposed to improve traffic flow for the new entry complex. Parking counts and ingress/egress points are not expected to change significantly.

During construction, there will be an increase in traffic as a result of construction vehicles. It is estimated that up to fifty construction trucks per day may occur for short periods only during daylight hours and weekdays. It is estimated that 120 workers may be on the site during peak construction times. This traffic impact will be short-term and temporary. There will be a proposed construction haul road along the former railroad bed that will segregate construction traffic from Zoo patron traffic within the Park road network. Once construction is complete, traffic as a result of the Proposed Action will not increase significantly beyond the current road network capacity.

For these reasons, no significant adverse environmental impacts to transportation systems are anticipated.

14. Impact on Energy

Several new buildings are proposed as part of the overall work at the Zoo including a replacement of the Main Zoo Building. While these new buildings will result in an increase in the usage of electricity and natural gas for heating, the Zoo is currently serviced by public utilities and sufficient capacity exists for them. Replacement of older buildings on the Zoo grounds with newer energy-efficient buildings subject to current building code standards, including energy codes, which will likely increase their energy efficiency. As a result, energy consumption will likely improve through the use of more efficient building/HVAC systems, lighting, and materials.

Additionally, the new Entry / Administration Building is proposed to be serviced by a geothermal heating / cooling system. This renewable energy source will significantly reduce the Zoo's reliance on natural gas and electricity use over the life of the building.

For these reasons, no significant adverse environmental impacts to energy are anticipated.

15. Impact on Noise, Odor, and Light

With the proposed scope of work at the Zoo, an increase in noise, odor and light is expected during daylight weekday hours for the duration of the construction project. The

extent of the increases will be contained to the Park boundary. For Phase 2 work, the proposed service road improvements (shifting to the east, construction of a new walking path and a wooden fence) will result in the removal of vegetation within the Zoo boundary adjacent to the eastern property line. Although increased noise may occur during the construction phase, these are temporary in nature, and similar in duration and intensity as other commercial construction activities. Construction best practices will be strictly used for these efforts in order to minimize any impacts to neighboring properties.

For these reasons, no significant adverse environmental impacts associated with noise, odor, or light are anticipated.

16. Impact on Human Health

The Zoo has no past history of environmental concern that would result in a negative impact to human health and no hazardous operations presently or are proposed to occur there. As part of the construction work, asbestos-containing building materials (ACBM) and lead could be encountered during demolition due to the age of each of the buildings. A plan for the proper removal and disposal will be prepared in accordance with applicable rules, regulations, and laws should they be encountered.

Two environmental sites have been identified within 2,000 feet of the Zoo, both associated with Kodak on the west side of the Genesee River. Both of these are still currently in use with one subject to site management (#828071) and the other having environmental easements (#828177). Both have various remedial action programs in place. No significant adverse environmental impacts on human health are anticipated.

17. Consistency with Community Plans

Monroe County is responsible for the operation, maintenance, and planning of the facility. Monroe County's most current Zoo Master Plan (2015) outlines the various infrastructure and program improvements that are needed to provide a first-class facility for the community, an educational experience to visitors, and deliver exceptional and appropriate care and habitat for exhibited animals. This document provided a framework for this proposed development of the Zoo. Therefore, no significant adverse environmental impacts to community plan consistency are anticipated.

18. Consistency with Community Character

Seneca Park Zoo is an important asset to the community from an educational, recreation, economic, and social perspective. The proposed work, while resulting in a visual change in portions of the Zoo, will be a positive overall contribution in that it will rectify and modernize outdated buildings and facilities that no longer serve zoo animals well and ensure accreditation by the Association of Zoos & Aquariums (AZA). The proposed modifications will provide the community with a welcoming, friendly environment for resident animals and visitors, while providing space for additional animals. Building and site design will take into account the historical and cultural significance of both the Zoo

and Seneca Park. Appropriate architectural elements and materials along with interpretive features will be utilized. The impact to the community will be a positive one in that improvements will continue the Zoo's ability to serve as a valuable resource to the region.

The Town of Brighton is proposing to install 700 lineal feet of ADA compliant concrete sidewalk. The sidewalk will start at the existing sidewalks at #2407 East Avenue (Crossways Condominiums) on the northside of the road and travel westward along the properties #2370 & # 2290 East Avenue. There are five apartment complex's which include senior living that are within this census block with approximately 811 living units along with residential houses. The Scobell Chemical NYSDOT Site is located across the 590 expressway and approximately 1400 feet away. The site is in the State Superfund Program and is actively being monitored and remediated. Review by the State Historic Preservation Office (SHPO) has been started and is anticipated to be completed prior to a final decision on this project is completed. Negative Declaration - Determination of No Significant Effect on the Environment:

The Town of Chili will install approximately 1,400 LF of concrete sidewalk along the west side of Archer Road from the terminus of a section of new sidewalk south to a point on of connection with a Town owned parcel located at 177 Archer Road. The project would provide a needed ADA compliant connection for pedestrians wishing travel from residential areas to the commercial core and Town facilities located along Chili Avenue. The project may disturb more than 4000 sf of land, but does not impact wetlands, the 100 year floodplain or any structures more than 50 years old. The new sidewalks will benefit the residents by improving the overall safety for those who walk frequently in the area. The project will not impact existing natural resources, wetlands, historical or cultural resources and will not alter the existing community character or increase traffic. The proposed action is consistent with existing land use. Accordingly, the proposed action will have no significant effect upon the environment and is determined to be a negative determination.

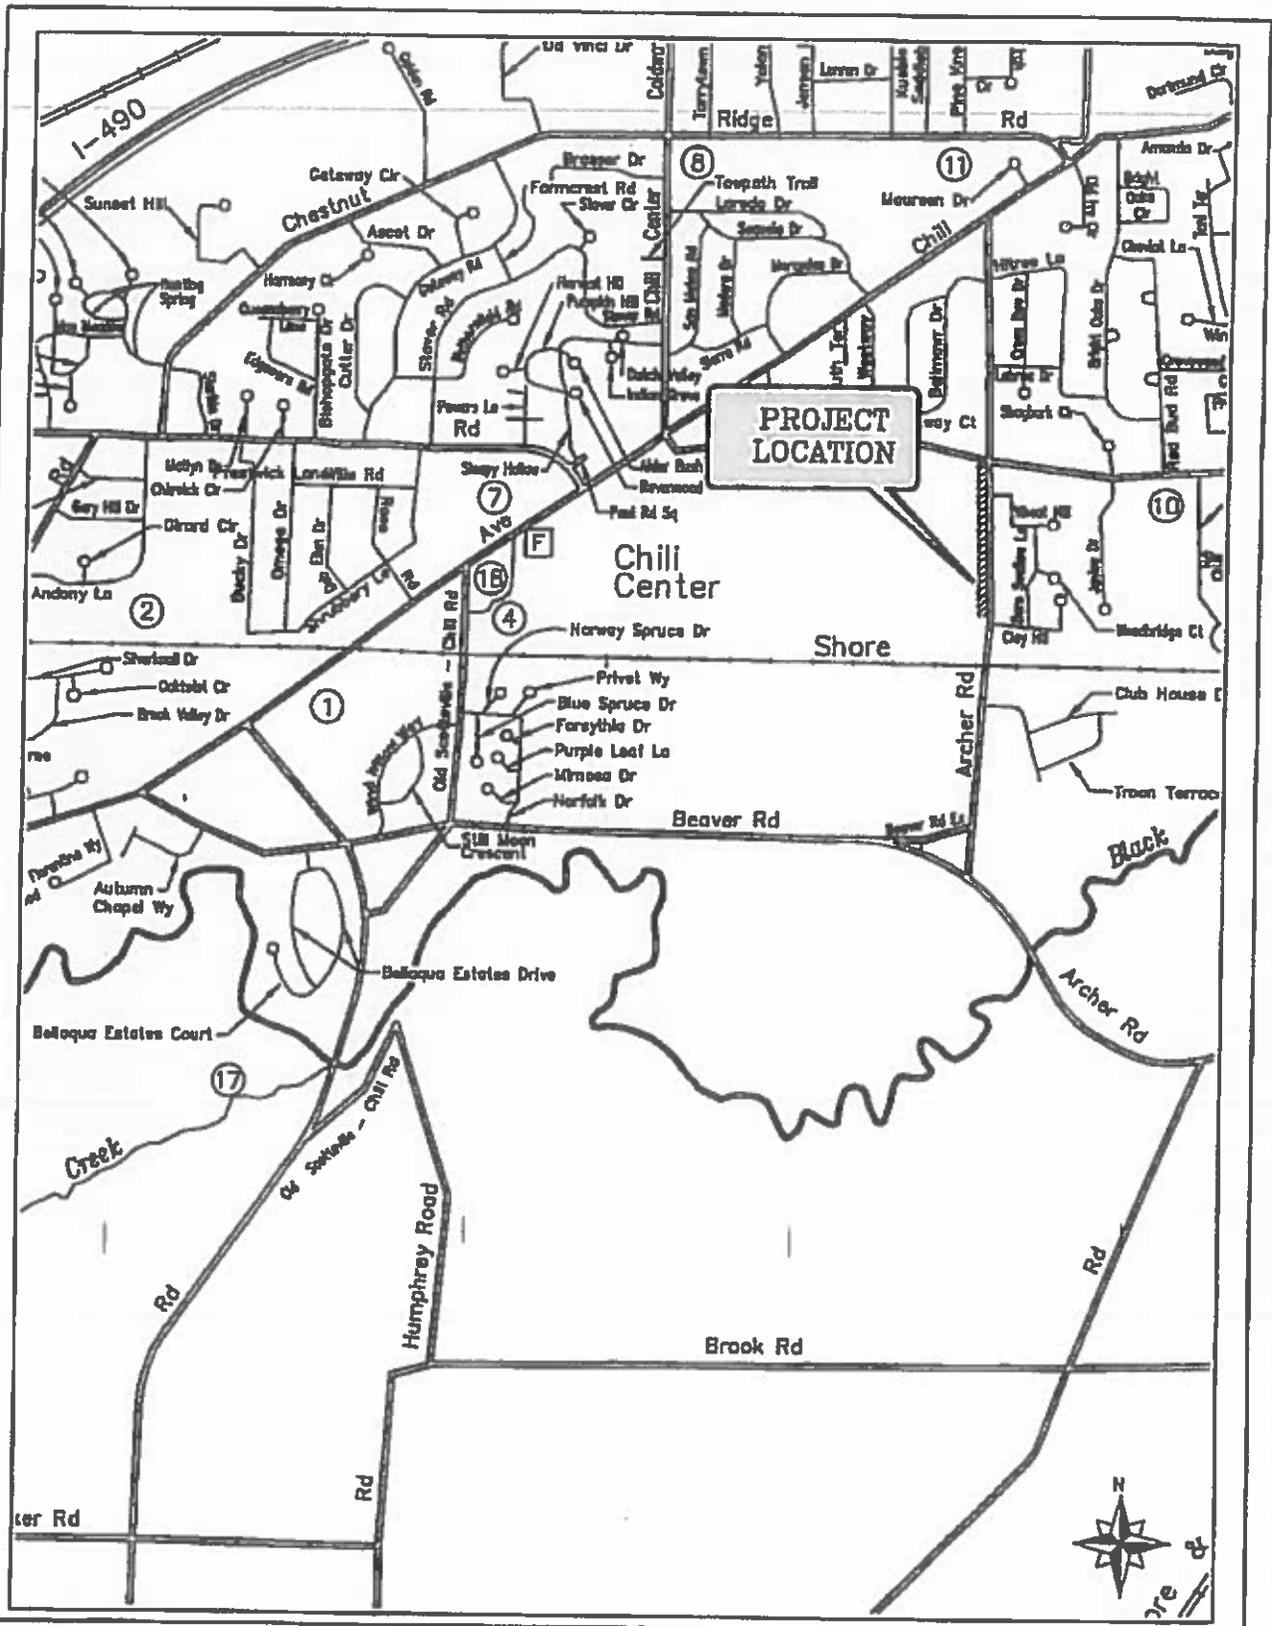

Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.

Short Environmental Assessment Form Part 3 Determination of Significance

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

Monroe County intends to lease 819-827 West Main Street, Rochester, NY (Tax ID # 120.43-2-2) for 10,460 sq ft of office and laboratory space for the Monroe County Public Health STD Clinic. The facility is intended for interior space with typical parking and access from the outside.

The Part 1 EAF indicated that the site is in close proximity to a building, archaeological site, or district which is listed on the National or State Register of Historic Places and a property that has been the subject of remediation.

No historic resources will be affected by the lease of 819-827 West Main Street. No resources are directly adjacent to the site. There are several buildings on, or eligible, the national registry of historic resources, but none will be directly affected by the lease of 819-827 West Main Street. As it's use is consistent with the surrounding community and it is an existing structure.

Across the street from the site, there is a Voluntary Cleanup Program at the site of a Rite Aid drug store that was built in recent years (Spill 9609530). During phase II they found contamination likely associated with former service station (Hess and Graff Oil) located at the site. The cleanup consisted of removing former underground storage tanks that were filled with slurry and left in place. The tanks were dug out and cleaned. Contaminated soil was excavated. An area of #2 Fuel Oil was also identified. The contaminated soils were dug out, disposed of at a secure landfill the site was closed out 12/02/1999. This issue has been resolved and will not impact the lease of 819-827 West Main Street

For the above reasons the lease of 819-827 West Main Street will not result in any significant adverse environmental impacts.

- Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.
- Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action will not result in any significant adverse environmental impacts.

Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

Monroe County intends to lease 819-827 West Main Street, Rochester, NY (Tax ID # 120.43-2-2) for 10,460 sq ft of office and laboratory space for the Monroe County Public Health STD Clinic. The facility is intended for interior space with typical parking and access from the outside.

The Part 1 EAF indicated that the site is in close proximity to a building, archaeological site, or district which is listed on the National or State Register of Historic Places and a property that has been the subject of remediation.

No historic resources will be affected by the lease of 819-827 West Main Street. No resources are directly adjacent to the site. There are several buildings on, or eligible, the national registry of historic resources, but none will be directly affected by the lease of 819-827 West Main Street. As it's use is consistent with the surrounding community and it is an existing structure.

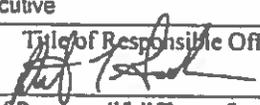

Across the street from the site, there is a Voluntary Cleanup Program at the site of a Rite Aid drug store that was built in recent years (Spill 9609530). During phase II they found contamination likely associated with former service station (Hessand Graff Oil) located at the site. The cleanup consisted of removing former underground storage tanks that were filled with slurry and left in place. The tanks were dug out and cleaned. Contaminated soil was excavated. An area of #2 Fuel Oil was also identified. The contaminated soils were dug out, disposed of at a secure landfill the site was closed out 12/02/1999. This issue has been resolved and will not impact the lease of 819-827 West Main Street.

For the above reasons the lease of 819-827 West Main Street will not result in any significant adverse environmental impacts.

Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.

Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action will not result in any significant adverse environmental impacts.
