RESOLUTION NO. _____ OF 2025

CLASSIFICATION OF ACTION AND DETERMINATION OF SIGNIFICANCE PURSUANT TO STATE ENVIRONMENTAL QUALITY REVIEW ACT FOR ACCEPTANCE OF RESTORE NEW YORK GRANT FROM EMPIRE STATE DEVELOPMENT CORPORATION FOR CITY GATE PROJECT

BE IT RESOLVED BY THE LEGISLATURE OF THE COUNTY OF MONROE, as follows:

Section 1. The Monroe County Legislature determines that acceptance of Restore New York Grant from Empire State Development Corporation for the City Gate Project is a Type 1 action.

Section 2. The Monroe County Legislature designates Monroe County to serve as Lead Agency pursuant to a coordinated review.

Section 3. The Monroe County Legislature determines that, to the extent consideration of the Project without also reviewing the future City Gate development constitutes segmentation, segmentation is warranted under these circumstances pursuant to 6 NYCRR §617.3(g)(1) for the following reasons:

- a. The Project is functionally independent from the future development of City Gate. This Project is necessary to demolish the former Monroe County Division of Pure Waters (MCDPW) Services building and stabilize the Iola Power Station regardless of future developments and construction at City Gate;
- b. Information on the future phases of City Gate development is speculative and may not occur; and
- c. The City Gate development is currently expected to exceed the thresholds of 6 NYCRR § 617.4 and therefore will be reviewed as a Type I action. Reviewing the potential impacts of the Project separately from the full environmental assessment and, if necessary, environmental impact statement from the City Gate development will be no less protective of the environment.

Section 4. The Monroe County Legislature has reviewed and considered the Full Environmental Assessment Form dated July 25, 2025 and has considered the potential environmental impacts of the Project pursuant to the requirements of State Environmental Quality Review Act and has found that the proposed action will not result in any significant adverse environmental impacts. The Monroe County Legislature hereby issues and adopts the Negative Declaration attached hereto and made a part hereof and determines that an environmental impact statement is not required.

Section 5. The County Executive, or his designee, is hereby authorized to take such actions to comply with the requirements of the State Environmental Quality Review Act, including without limitation, the execution of documents and the filing, distribution, and publication of the documents required under the State Environmental Quality Review Act, and any other actions to implement the intent of this resolution.

Section 6. This resolution shall take effect in accordance with Section C2-7 of the Monroe County Charter.

Full Environmental Assessment Form
Part 2 - Identification of Potential Project Impacts

Project :	Agency Use Only (If applicable) CityGate Demolition and Improvements
Date :	9-25-25

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency **and** the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section.
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

Full Environmental Assessment Form

Part 3 - Evaluation of the Magnitude and Importance of Project Impacts and Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

This project involves the demolition of the former Monroe County Pure Waters (MCDPW) Services building, and site improvements to the former Iola Power Station, as part of the ongoing City Gate development in the City of Rochester. This will include the restoration and renovation of the 16,718 square foot former Iola Power Station at the 2.23-acre site located at 422 East Henrietta Road in the City of Rochester and the demolition of a 50,675 square foot vacant building at the 11.74-acre site location at 460 East Henrietta Road in the City of Rochester.

Impact on Land

The proposed action involves the disturbance of previously developed land. The demolition of the Monroe County Pure Waters Services building will not have a negative impact on the project site. The land is already disturbed and has been developed in the past, minimizing any potential environmental effects associated with this activity.

Impact on Historical and Archaeological Resources

The Monroe County Pure Waters Services building is located on a parcel adjacent to the New York State (NYS) Barge Canal. As part of the coordinated environmental review, the NYS Barge Canal was formally contacted. Additionally, a desktop review was conducted using the Cultural Resource Information System (CRIS) through the New York State Historic Preservation Office (SHPO). Based on these reviews, it has been determined that the project will not have an impact on the NYS Barge Canal or any associated historical or archaeological resources.

Impact on the Environment

This project is anticipated to include demolition and site improvements to already disturbed land and will have minimal or no impacts on geological features, water resources (surface and groundwater), flooding, air quality, plants and animals, agricultural resources, aesthetic resources, open space and recreation, critical environmental areas, transportation, energy, human health, and community plans/character. The project may have temporary impacts to noise, odor, and/or light during the demolition period, but these impacts, if any, will be limited to typical construction hours and therefore will have a minor, if any, impact on the environment.

Determination

Based on the findings of the environmental review, including the assessments of land use and historical resources, it has been determined that the proposed project will not result in significant adverse environmental impacts. Accordingly, a Negative Declaration has been issued pursuant to the State Environmental Quality Review Act (SEQRA).

Determination of Significance - Type 1 and Unlisted Actions

SEQR Status: ☒ Type 1 ☐ Unlisted

Identify portions of EAF completed for this Project: ☒ Part 1 ☒ Part 2 ☒ Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the
 Monroe County as lead agency that:

☒ A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

☐ B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.7(d)).

☐ C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.

September 2, 2025

Dear President Roman,

With over eight years of shaping Rochester's planning policies, I am eager to bring this experience to Monroe County to help align city and county priorities for a stronger region. I have gained extensive experience in evaluating land use policies, guiding development decisions, and fostering community dialogue on the future of our city.

Most notably, I was actively involved in shaping the Rochester 2034 Comprehensive Plan, a 15-year blueprint that reflects thousands of voices across our community. Contributing to Rochester 2034 allowed me to engage with its core principles—equity, resilience, prosperity, and healthy living—and to support strategies that align growth with sustainability. I am particularly proud of the plan's placemaking focus, which promotes pedestrian-scale design, diverse housing choices, preservation of community assets, and stronger multi-modal transportation networks.

In addition to my planning commission service, I bring a professional background in architecture and over 15 years of project management experience across major institutional, healthcare, and infrastructure projects. My service as Chair of the Rochester Housing Council and as a board member of the Center for Youth reflects my commitment to our communities through both policy and practice.

Through these experiences, I have developed a deep appreciation for how thoughtful planning can strengthen not only individual neighborhoods but also the vitality of the region as a whole. Serving on the Monroe County Planning Board would allow me to extend this perspective beyond the city, helping to bridge city-county planning priorities and ensure that growth, economic development, and environmental stewardship are advanced in a coordinated way.

I would be honored to bring my experience, commitment, and collaborative spirit to the Monroe County Planning Board. Thank you for your consideration, and I would welcome the opportunity to discuss how my experience in architecture, project management, and planning can advance Monroe County's vision for equitable growth.

Sincerely,

Milton Pichardo
