Part 3 Determination of Significance

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

Part 1 of the EAF indicates that the site contains or is near wetlands and a floodplain. This action pertains solely to the sale of a tax foreclosed surplus property on Euler Road in the Town of Ogden. No wetlands or floodplains will be impacted by the sale itself. Any future development of the parcel will be subject to local zoning and building codes, as well as all applicable federal and New York State wetland and floodplain regulations.

Accordingly, no wetlands or floodplains will be impacted from this sale and the action will not result in any significant adverse environmental impacts.

- Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.
- Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action will not result in any significant adverse environmental impacts.

Part 3 Determination of Significance

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

Part 1 of the EAF indicates that the site contains or is near wetlands and a remediation site. This action pertains solely to the acquisition of easements necessary to replace the culvert on Peck Road. No wetlands or remediation site will be impacted by the acquisition itself. Any future development will be subject to local zoning and building codes, as well as all applicable federal and New York State wetland regulations.

The Trimmer Road Landfill remediation site is listed under the State Superfund Program and is located approximately 2,600 feet south of the project. Remediation at this site has been completed.

Accordingly, no wetlands or remediation site will be impacted from this acquisition and the action will not result in any significant adverse environmental impacts.

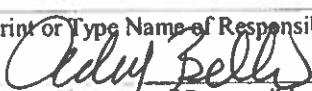

- Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.
- Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action will not result in any significant adverse environmental impacts.

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

Critical Environmental Area

The proposed action involves the disturbance of previously developed land. Due to proximity to the Genesee River, the site is within a Critical Environmental Area (areas within 100ft of the Genesee River). This action will not disturb or have an adverse impact on the Critical Environmental Area.

Impact on Historical and Archaeological Resources

The mapper noted that the site is near a potential Archeological site, however the land has been previously disturbed and has been developed since at least 1935, minimizing any potential environmental effects associated with this activity.

National or State Register of Historic Places

A review was requested by the State Historic Preservation Office (SHPO), who concluded in their March 23, 2022 letter: It is the opinion of the New York SHPO that no historic properties including archaeological and/or historic resources will be affected by this undertaking.

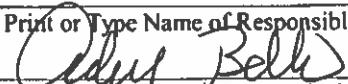

- Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.
- Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action will not result in any significant adverse environmental impacts.
