RESOLUTION NOS. 21R-005; 21I-002 OF 2021

AUTHORIZING CONTRACTS WITH MRB GROUP FOR PROFESSIONAL ENGINEERING SERVICES AND UNIVERSITY OF ROCHESTER FOR GENESEE VALLEY PUMP STATION PROJECT

BE IT RESOLVED BY THE PURE WATERS ADMINISTRATIVE BOARD OF THE ROCHESTER PURE WATERS DISTRICT AND IRONDEQUOIT BAY SOUTH CENTRAL PURE WATERS DISTRICT, as follows:

Section 1. The County Executive, or his designee, is hereby authorized to execute a contract with MRB Group in the amount of $346,670 for professional engineering services for the Genesee Valley Pump Station project, and any amendments necessary to complete the project within the total capital fund(s) appropriation.

Section 2. The County Executive, or his designee, is hereby authorized to execute a contract with the University of Rochester for financial participation in and the conveyance of interest in real property.

Section 3. Funding for this project, consistent with authorized uses, will be included in capital fund 2009 and in any other capital fund(s) created for the same intended purpose. The local funding for this project will ultimately be provided by Pure Waters District user fees.

Section 4. This resolution shall take effect immediately.

Intro No. 397

LOCAL LAW ENTITLED “TO ESTABLISH THE FOOD DELIVERY FAIRNESS ACT”

BE IT ENACTED BY THE LEGISLATURE OF THE COUNTY OF MONROE, as follows:

Section 1. Title

This local law shall be known as the law “To Establish the Food Delivery Fairness Act”

Section 2. Definitions

“Restaurant” shall have the same meaning as provided in §569-50 of the Monroe County Code.

“Third-party food delivery service” shall mean any website, mobile application or other internet service that offers or arranges for the sale of food and beverages prepared by, and the same-day delivery and same-day pickup of food and beverages from, restaurants located in the County that are owned and operated by different persons.

Section 3. Listing on Third-Party Food Delivery Service Platforms

1. A third-party food delivery service shall not list, advertise, promote, or sell a restaurant’s products, or arrange for the delivery of an order of such products, on a third-party food delivery platform without a valid written agreement with the restaurant authorizing the inclusion of their products on such platform.

2. In the event a third-party food delivery service receives a written request from a restaurant requesting that such restaurant be removed from such third-party food delivery service's application and/or website, such third-party food delivery service shall confirm receipt of such request and remove such restaurant from its application and/or website immediately thereafter.

Section 4. Enforcement

1. In the event that a third-party food delivery platform does not remove a restaurant from its application and/or website after receiving a request to do so from such restaurant within five business days of receiving such request, a restaurant may enforce this Chapter by means of a civil action seeking injunctive relief. The prevailing party in any such action shall be entitled to an award of reasonable attorney fees.

Section 5. Severability

If any clause, sentence, paragraph, section, subdivision or other part of this Local Law or its application shall be adjudged by a Court of competent jurisdiction to be invalid or unconstitutional, such order or judgment shall not affect, impair, or otherwise invalidate the remainder of this Local Law which shall remain in full force and effect except as limited by such order or judgment.

Section 6. Preemption
This section shall be null and void on the day statewide legislation goes into effect, incorporating either the same or substantially similar provisions as are contained in this law, unless state law specifically exempts from preemption earlier enacted local laws in this area. The County Legislature may determine via resolution whether or not identical or substantially similar statewide legislation or pertinent preempting state or federal regulations have been enacted for the purposes of triggering the provisions in this section.

Section 7. Effective Date

This Local Law shall take effect in accordance with the provisions of the Municipal Home Rule Law and the Monroe County Charter.

RESOLUTION NO. 284 OF 2021

FIXING A PUBLIC HEARING ON LOCAL LAW (INTRO. NO. 397 OF 2021) ENTITLED “TO ESTABLISH THE FOOD DELIVERY FAIRNESS ACT”

BE IT RESOLVED BY THE LEGISLATURE OF THE COUNTY OF MONROE, as follows:

Section 1. That there will be a public hearing at 6:15 P.M. on the 12th day of October, 2021, in the Legislative Chambers in the County Office Building, Rochester, New York on Local Law (Intro. No. 397 of 2021) entitled “To Establish the Food Delivery Fairness Act”.

Section 2. The Clerk of the Legislature is directed to give notice of the time and place of this public hearing, and a description of the proposed local law, to the news media within the County, and shall conspicuously post a copy of said notice in the office of the Clerk at least five days before said hearing. In addition, the Clerk shall cause said notice to be published once in the official newspapers of general circulation within the County at least five days before said hearing.

Section 3. This resolution shall take effect upon filing with the Secretary of State pursuant to Section 27 of the New York State Municipal Home Rule Law.

RESOLUTION NO. 285 OF 2021

APPROVING INCREASE AND IMPROVEMENT OF FACILITIES IN ROCHESTER PURE WATERS DISTRICT – ADD PROJECT ENTITLED “GENEESE VALLEY PUMP STATION,” AND AMENDING THE 2021-2026 CAPITAL IMPROVEMENT PROGRAM

WHEREAS, the Administrative Board of the Rochester Pure Waters District of the County of Monroe, New York has heretofore duly caused to be prepared, pursuant to Section 268 of the County Law, a map and plan by an engineer duly licensed by the State of New York for a proposed increase and improvement of the facilities of said District, consisting of adding project entitled “Genesee Valley Pump Station,” all as more fully set forth in such map and plan; and

WHEREAS, the County Legislature of the County of Monroe has called a public hearing on the aforesaid increase and improvement of facilities in accordance with the provisions of Section 268 of the County Law, and said public hearing held on the 14th day of September, 2021 at 6:16 P.M. in the Legislative Chambers of the County Office Building, Rochester, New York, in said County; and

WHEREAS, notice of said public hearing was duly published in the manner provided by law and proof thereof has been submitted to said County Legislature; and

WHEREAS, said County Legislature has duly considered the evidence given at said public hearing.

NOW, THEREFORE, BE IT RESOLVED BY THE LEGISLATURE OF THE COUNTY OF MONROE, as follows:

Section 1. Upon the evidence given at the aforesaid public hearing, it is hereby found and determined that it is in the public interest to increase and improve the facilities in the Rochester Pure Waters District, at a maximum estimated cost of $5,500,000, with 50% of these costs being reimbursed by the University of Rochester, all as more fully described in the preambles hereof.

Section 2. The cost of such increase and improvement shall be assessed against the entire geographic area encompassed by the Rochester Pure Waters District.

Section 3. The expenditure proposed for such improvement of facilities in the Rochester Pure Waters District is in the public interest and will not constitute an undue burden on the property which will bear the cost thereof; and all real property to be assessed for such expenditure will be benefited by the proposed improvements and no benefited property has been excluded.

Section 4. The increase and improvement of facilities in the Rochester Pure Waters District is hereby approved at the maximum amount to be expended.

Section 5. The 2021-2026 Capital Improvement Program is hereby amended to add a project entitled “Genesee Valley Pump Station” with funding in the amount of $5,500,000 in 2021.

Section 6. The County Executive or the Director of Finance - Chief Financial Officer are hereby authorized to file applications and execute Project Financing Agreements and any other necessary documents as appropriate, for participation in the New York State Water Pollution Control Revolving Loan Fund under
applicable laws of New York State or the Federal Environmental Protection Agency to finance all or a portion of the project to finance all or a portion of the project.

Section 7. The Clerk of the Legislature is hereby authorized and directed to send certified copies of this resolution to the New York State Department of Audit and Control.

Section 8. The Administrative Board of the Rochester Pure Waters District of said County is hereby directed to proceed with the improvements in the manner set forth in Section 262 of the County Law.

Section 9. This resolution shall take effect in accordance with Section C2-7 of the Monroe County Charter.

ACTION BY THE COUNTY EXECUTIVE

APPROVED: [Signature] DATE: 9/21/2021

VETOED:

SIGNATURE: [Signature] DATE: 9/21/2021

EFFECTIVE DATE OF RESOLUTION: 9/21/2021
RESOLUTION AUTHORIZING THE ISSUANCE OF $5,500,000 BONDS OF THE COUNTY OF MONROE, NEW YORK, TO FINANCE THE COST OF THE GENESEE VALLEY PUMP STATION PROJECT IN AND FOR SAID COUNTY, AT AN ESTIMATED MAXIMUM COST OF $5,500,000

BE IT RESOLVED BY THE AFFIRMATIVE VOTE OF NOT LESS THAN TWO-THIRDS OF THE TOTAL VOTING STRENGTH OF THE LEGISLATURE OF THE COUNTY OF MONROE, as follows:

Section 1. For the object or purpose of financing the cost of the Genesee Valley Pump Station Project, consisting of a new sewage pump station and force main, on behalf of the Rochester Pure Waters District, in and for the County of Monroe, New York (the “County”), there are hereby authorized to be issued $5,500,000 bonds of the County, pursuant to the provisions of the Local Finance Law. The duly adopted current Capital Budget of the County, to the extent inconsistent herewith, is hereby amended to provide for the appropriation of the amount hereby authorized to pay the cost of the aforesaid specific object or purpose. The period of probable usefulness of the aforesaid specific object or purpose is forty (40) years, pursuant to subdivision 4 of paragraph a of Section 11.00 of the Local Finance Law.

Section 2. The maximum estimated cost thereof is $5,500,000, and the plan for the financing thereof is by the issuance of $5,500,000 bonds of said County herein authorized; provided, however, that to the extent any state and/or federal aid and/or grant and/or gift is received for the aforesaid purpose, such aid shall be used to redeem any outstanding indebtedness incurred for such purpose or shall be applied, dollar for dollar, to reduce the amount of bonds to be issued for such purpose.

Section 3. The faith and credit of the County are hereby irrevocably pledged for the payment of the principal of and interest on such obligations as the same respectively become due and payable. To the extent not paid from rates, rents or charges, there shall annually be apportioned and assessed upon the several lots and parcels of land within the District, in the manner provided by law, an amount sufficient to pay the principal of and interest on such obligations becoming due and payable in such year, but if not paid from such sources, all of the taxable real property of the County shall be subject to a tax sufficient to pay the principal of and interest on such obligations as the same become due and payable.

Section 4. Subject to the provisions of the Local Finance Law, the power to authorize the issuance of and to sell the bonds and bond anticipation notes in anticipation of the issuance and sale of the bonds herein authorized, including renewals of such notes, is hereby delegated to the Director of Finance - Chief Financial Officer, the chief fiscal officer of the County under the Local Finance Law. The Director of Finance - Chief Financial Officer may sell such bonds or notes at public or private sale, at a discount or premium, at fixed or variable rates of interest or at no interest whatsoever, or as capital appreciation bonds, and with such amortization of principal as the Director of Finance - Chief Financial Officer shall determine is most favorable to the County, and in compliance with any rules of the State Comptroller applicable thereto. Such bonds or notes shall be of such terms, form and contents, and shall be sold in such manner, as may be prescribed by said Director of Finance - Chief Financial Officer, consistent with the provisions of the Local Finance Law. The Director of Finance - Chief Financial Officer may, in the event it is determined to issue
variable rate bonds or notes, enter into such agreements as said officer finds reasonable to facilitate the issuance, sale, resale and repurchase of such bonds or notes, as authorized under Section 54.90 of the Local Finance Law. The Director of Finance - Chief Financial Officer is also authorized to enter into such agreements and take such other action as may be necessary or appropriate and lawful to assure that, to the extent possible, (i) interest on the bonds and notes authorized hereby will not be includable in the gross income, for federal income tax purposes, of the recipients thereof, and (ii) to enable the purchaser thereof to comply with Securities and Exchange Commission Rule 15c2-12. The Director of Finance - Chief Financial Officer is hereby further delegated all powers of this County Legislature with respect to agreements for credit enhancement, derived from and pursuant to Section 168.00 of the Local Finance Law, for such bonds or notes, including, but not limited to the determination of the provider of such credit enhancement facility or facilities and the terms and contents of any agreement or agreements related thereto.

Section 5. All other matters, except as provided herein, relating to such bonds or notes, including prescribing whether manual or facsimile signatures shall appear on said bonds or notes, prescribing the method for the recording of ownership of said bonds or notes, appointing the fiscal agent or agents for said bonds or notes, providing for the printing and delivery of said bonds or notes (and if said bonds or notes are to be executed in the name of the County by only facsimile signatures, providing for the manual countersignature of a fiscal agent or of a designated official of the County), the date, form, denominations, maturities, interest rate or rates, terms of and manner of sale and interest payment dates, place or places of payment, and also including the consolidation with other issues, shall be determined by the Director of Finance - Chief Financial Officer. The Director of Finance - Chief Financial Officer may elect to become the fiscal agent for the bonds or notes, or may contract on behalf of the County for this service pursuant to the Local Finance Law. Such bonds or notes shall contain substantially the recital of validity clause provided for in Section 52.00 of the Local Finance Law and shall otherwise be in such form and contain such recitals, in addition to those required by Section 52.00 of the Local Finance Law, as the Director of Finance - Chief Financial Officer shall determine.

Section 6. The validity of such bonds and bond anticipation notes, as authorized by this resolution, may be contested only if:

1) such obligations are authorized for an object or purpose for which said County is not authorized to expend money, or

2) the provisions of law which should be complied with at the date of publication of this resolution are not substantially complied with, and

an action, suit or proceeding contesting such validity is commenced within twenty (20) days after the date of such publication, or

3) such obligations are authorized in violation of the provisions of the Constitution.

Section 7. This resolution shall constitute a statement of official intent for purposes of Section 1.150-2 of the Treasury Regulations. Other than as specified in this resolution, no monies are, or are reasonably expected to be, reserved, allocated on a long-term basis, or otherwise set aside with respect to the permanent funding of the objects or purposes described herein.

Section 8. This resolution shall take effect in accordance with Section C2-7 of the Monroe County Charter and the Clerk of the Legislature is hereby authorized and directed to publish this resolution or a summary thereof to be published, together with a notice attached in substantially the form and in the manner prescribed by Section 81.00 of the Local Finance Law.

BE IT RESOLVED BY THE LEGISLATURE OF THE COUNTY OF MONROE, as follows:

Section 1. The County Executive, or his designee, is hereby authorized to execute a contract, and any amendments thereto, with Causewave Community Partners, Inc. for implementation of the Stormwater Community Education Program in the amount of $60,000 for the period of January 1, 2021 through December 31, 2021, with the option to renew for four (4) additional one-year terms in an amount not to exceed $60,000 per year.

Section 2. Funding for this contract is included in trust fund 9626, Stormwater Coalition Dues.

Section 3. This resolution shall take effect in accordance with Section C2-7 of the Monroe County Charter.

Intro. No. 410

RESOLUTION NO. 292 OF 2021

CLASSIFICATION OF ACTION AND DETERMINATION OF SIGNIFICANCE PURSUANT TO STATE ENVIRONMENTAL QUALITY REVIEW ACT FOR GENESEE VALLEY PUMP STATION PROJECT

BE IT RESOLVED BY THE LEGISLATURE OF THE COUNTY OF MONROE, as follows:

Section 1. The Monroe County Legislature determines that the Genesee Valley Pump Station Project is an Unlisted action.

Section 2. Monroe County shall serve as Lead Agency pursuant to a coordinated review.

Section 3. The Monroe County Legislature determines that, to the extent consideration of the Project without also reviewing the University of Rochester's potential expansion of its emergency medical facilities (the "Emergency Room Expansion") constitutes segmentation, segmentation is warranted under these circumstances pursuant to 6 NYCRR § 617.3(g)(1) for the following reasons:

   a. The Project is functionally independent from the Emergency Room Expansion. The Project is necessary to provide relief to and restore capacity in the Pure Waters Sewer District, and will benefit the sewershed regardless of whether the emergency room is ever approved and construction.

   b. Information on the Emergency Room Expansion is speculative and may not occur; and

   c. The Emergency Room Expansion is currently expected to exceed the thresholds of 6 NYCRR § 617.4 and therefore will be reviewed as a Type I action. Reviewing the potential impacts of the Project separately from the full environmental assessment and, if necessary, environmental impact statement for the Emergency Room Expansion will be no less protective of the environment.

Section 4. The Monroe County Legislature has reviewed and considered the Full Environmental Assessment Form dated July 9, 2021 and has considered the potential environmental impacts of the Genesee Valley Pump Station Project pursuant to the requirements of State Environmental Quality Review Act and has found that the proposed action will not result in any significant adverse environmental impacts. The Monroe County Legislature hereby issues and adopts the Negative Declaration attached hereto and made a part hereof and determines that an environmental impact statement is not required.

Section 5. The County Executive, or his designee, is hereby authorized to take such actions to comply with the requirements of the State Environmental Quality Review Act, including without limitation, the execution of documents and the filing, distribution and publication of the documents required under the State Environmental Quality Review Act, and any other actions to implement the intent of this resolution.

Section 6. This resolution shall take effect in accordance with Section C2-7 of the Monroe County Charter.

### Instructions for Completing Part 1

Part 1 is to be completed by the applicant or project sponsor. Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification.

Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information; indicate whether missing information does not exist, or is not reasonably available to the sponsor; and, when possible, generally describe work or studies which would be necessary to update or fully develop that information.

Applicants/sponsors must complete all items in Sections A & B. In Sections C, D & E, most items contain an initial question that must be answered either “Yes” or “No”. If the answer to the initial question is “Yes”, complete the sub-questions that follow. If the answer to the initial question is “No”, proceed to the next question. Section F allows the project sponsor to identify and attach any additional information. Section G requires the name and signature of the applicant or project sponsor to verify that the information contained in Part 1 is accurate and complete.

#### A. Project and Applicant/Sponsor Information

<table>
<thead>
<tr>
<th>Name of Action or Project:</th>
<th>Genesee Valley Pump Station &amp; Force Main</th>
</tr>
</thead>
<tbody>
<tr>
<td>Project Location (describe, and attach a general location map):</td>
<td>Genesee Valley Park near Roundhouse Pavilion and Genesee Waterways Center (43d07.20&quot;, 77d38.04&quot;)</td>
</tr>
<tr>
<td>Brief Description of Proposed Action (include purpose or need):</td>
<td>The project includes construction of a sanitary sewer pump station, within property owned by the University of Rochester, which will be capable of conveying approximately 3.5 million gallons per day (MGD). The pump station will be constructed within a proposed easement or property to be conveyed to Monroe County from the University of Rochester. The project also includes installation of a approximately 1,490 linear foot sanitary sewer facilities from the proposed pump station in a north west direction, through parklands owned by the City of Rochester, and under the Genesee River to a 54-inch sanitary sewer force main located on the west side of the Genesee River. The proposed underground force main, which will be constructed within parklands, will be contained within an approximate 30' wide easement, and the area will remain as parkland. A Parkland Alienation process will be completed prior to construction to receive approval for work within parklands. The project also includes an approximate 1,500 foot extension of the existing RBSCPWMD Brighton No. 5 pump station force main to the new sanitary sewer force main. The force main extension will be contained within an easement on property owned by the University of Rochester. The project purpose is to relieve the existing 24&quot; sewer of peak sanitary sewer flows.</td>

**i. Coastal Resources**

1. Is the project site within a Coastal Area, or the waterfront area of a Designated Inland Waterway? ☐ Yes ☒ No
2. Is the project site located in a community with an approved Local Waterfront Revitalization Program? ☒ Yes ☐ No
3. Is the project site within a Coastal Erosion Hazard Area? ☐ Yes ☒ No

### C. Planning and Zoning

**C.1 Planning and zoning actions.**

Will administrative or legislative adoption, or amendment of a plan, local law, ordinance, rule or regulation be the only approval(s) which must be granted to enable the proposed action to proceed?
- If Yes, complete sections C, F and G.
- If No, proceed to question C.2 and complete all remaining sections and questions in Part 1.

**C.2 Adopted land use plans.**

a. Do any municipally-adopted (city, town, village or county) comprehensive land use plans include the site where the proposed action would be located? ☒ Yes ☐ No
   
   If Yes, does the comprehensive plan include specific recommendations for the site where the proposed action would be located? ☒ Yes ☐ No

b. Is the site of the proposed action within any local or regional special planning district (for example: Greenway; Brownfield Opportunity Area (BOA); designated State or Federal heritage area; watershed management plan; or other)?
   
   If Yes, identify the plan(s):
   - NYS Heritage Areas, West Erie Canal Corridor, and City of Rochester Local Waterfront Revitalization Program
   - [Insert other plans]

   ☒ Yes ☐ No

c. Is the proposed action located wholly or partially within an area listed in an adopted municipal open space plan, an adopted municipal farmland protection plan, or an adopted municipal open space plan?

   If Yes, identify the plan(s):
   - [Insert plans]

   ☒ Yes ☐ No

---

**Page 2 of 13**
C.3. Zoning

a. Is the site of the proposed action located in a municipality with an adopted zoning law or ordinance. [☐ Yes [No]
   O-S Open Space District, O-A Overlay Airport District

b. Is the use permitted or allowed by a special or conditional use permit? [☐ Yes [No]

c. Is a zoning change requested as part of the proposed action? [☐ Yes [No]
   If Yes, what is the proposed new zoning for the site?

C.4. Existing community services.

a. In what school district is the project site located? Rochester City School District

b. What police or other public protection forces serve the project site? RPD, MCSO

c. Which fire protection and emergency medical services serve the project site? RFD, BFD, AMR, BVA

d. What parks serve the project site? Genesee Valley Park

---

D. Project Details

D.1. Proposed and Potential Development

a. What is the general nature of the proposed action (e.g., residential, industrial, commercial, recreational, if mixed, include all components)? Municipal utility project

b. a. Total acreage of the site of the proposed action? 6+ acres
   b. Total acreage to be physically disturbed? 0.1+ acres
   c. Total acreage (project site and any contiguous property) owned or controlled by the applicant or project sponsor? 590+ acres

c. Is the proposed action an expansion of an existing project or use? [☐ Yes [No]
   i. If Yes, what is the approximate percentage of the proposed expansion and identify the units (e.g., acres, miles, housing units, square feet)? 1% .001 (expand LF of pipe)

b. Is the proposed action a subdivision, or does it include a subdivision? [☐ Yes [No]
   i. Purpose or type of subdivision? (e.g., residential, industrial, commercial, if mixed, specify types)

ii. Is a cluster/conservation layout proposed? [☐ Yes [No]

iii. Number of lots proposed?

iv. Minimum and maximum proposed lot sizes? Minimum Maximum

d. Will the proposed action be constructed in multiple phases? [☐ Yes [No]
   i. If No, anticipated period of construction: 8+ months
   ii. If Yes:
      • Total number of phases anticipated
      • Anticipated commencement date of phase 1 (including demolition) ______ month ______ year
      • Anticipated completion date of final phase ______ month ______ year
      • Generally describe connections or relationships among phases, including any contingencies where progress of one phase may determine timing or duration of future phases:
f. Does the project include new residential uses?  
   If Yes, show numbers of units proposed.
   
<table>
<thead>
<tr>
<th>Initial Phase</th>
<th>One Family</th>
<th>Two Family</th>
<th>Three Family</th>
<th>Multiple Family (four or more)</th>

<tr>
<td>of all phases</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

   g. Does the proposed action include new non-residential construction (including expansions)?
   If Yes,  
   i. Total number of structures: 1  
   ii. Dimensions (in feet) of largest proposed structure: 12 height; 20 width; and 20 length  
   iii. Approximate extent of building space to be heated or cooled: 400 square feet  

   h. Does the proposed action include construction or other activities that will result in the impoundment of any liquids, such as creation of a water supply, reservoir, pond, lake, waste lagoon or other storage?  
   If Yes,  
   i. If a water impoundment, the principal source of the water:
      - Ground water  
      - Surface water streams  
      - Other specify:  
   iii. If other than water, identify the type of impounded/contained liquids and their source.
   iv. Approximate size of the proposed impoundment.  
      Volume: 6 million gallons; surface area: 10 acres  
   v. Dimensions of the proposed dam or impounding structure: height: 15 feet; length: 20 feet  
   vi. Construction method/materials for the proposed dam or impounding structure (e.g., earth fill, rock, wood, concrete):  

   D.2. Project Operations

   a. Does the proposed action include any excavation, mining, or dredging, during construction, operations, or both?  
      (Not including general site preparation, grading or installation of utilities or foundations where all excavated materials will remain onsite)  
      If Yes:  
      i. What is the purpose of the excavation or dredging?  
         Excavation for the pump station wet well and diversion structure  
      ii. How much material (including rock, earth, sediments, etc.) is proposed to be removed from the site?
         - Volume (specify tons or cubic yards): +/- 225 CY  
         - Over what duration of time? +/- 6 months  
      iii. Describe nature and characteristics of materials to be excavated or dredged, and plans to use, manage or dispose of them.  
         existing native soil disposed as required  
   iv. Will there be on-site dewatering or processing of excavated materials?
      - Yes  
      - No  
      If yes, describe, if dewatering is necessary, it will be discharged to a sanitary sewer system.
   v. What is the total area to be dredged or excavated?  
      Approximately 0.02 acres  
   vi. What is the maximum area to be worked at any one time?  
      Approximately 0.02 acres  
   vii. What would be the maximum depth of excavation or dredging?  
      Approximately 25 feet  
   viii. Will the excavation require blasting?  
      - Yes  
      - No  
   ix. Summarize site reclamation goals and plan:  
      
   b. Would the proposed action cause or result in alteration of, increase or decrease in size of, or encroachment into any existing wetland, waterbody, shoreline, beach or adjacent area?  
      - Yes  
      - No  
      If Yes:  
      i. Identify the wetland or waterbody which would be affected (by name, water index number, wetland map number or geographic description):  
         Genesee River - NYDREC ID of 0401-0001
ii. Describe how the proposed action would affect that waterbody or wetland, e.g., excavation, fill, placement of structures, or alteration of channels, banks and shorelines. Indicate extent of activities, alterations and additions in square feet or acres:

* Proposed action involves directional drilling underneath the Genesee River. Because the pipeline will be directionally drilled, no actual impacts are anticipated.

iii. Will the proposed action cause or result in disturbance to bottom sediments?
   - Yes ☐ No ☑

iv. Will the proposed action cause or result in the destruction or removal of aquatic vegetation?
   - Yes ☐ No ☑
   * acres of aquatic vegetation proposed to be removed:
   * expected acreage of aquatic vegetation remaining after project completion:
   * purpose of proposed removal (e.g., beach clearing, invasive species control, boat access):
   * proposed method of plant removal:
   * if chemical/herbicide treatment will be used, specify product(s):

v. Describe any proposed reclamation/mitigation following disturbance:

   No reclamation/mitigation is anticipated to be needed. If required, proposed action will follow NYSDEC and US ACEE guidance.

c. Will the proposed action use, or create a new demand for water?
   - Yes ☐ No ☑

i. Total anticipated water usage/demand per day: ___________ gallons/day

ii. Will the proposed action obtain water from an existing public water supply?
   - Yes ☐ No ☑
   * Name of district or service area:
   * Does the existing public water supply have capacity to serve the proposal?
   * Is the project site in the existing district?
   * Is expansion of the district needed?
   * Do existing lines serve the project site?

iii. Will line extension within an existing district be necessary to supply the project?
   - Yes ☐ No ☑
   * Describe extensions or capacity expansions proposed to serve this project:
   * Source(s) of supply for the district:

iv. Is a new water supply district or service area proposed to be formed to serve the project site?
   - Yes ☐ No ☑
   * Applicant/sponsor for new district:
   * Date application submitted or anticipated:
   * Proposed source(s) of supply for new district:

v. If a public water supply will not be used, describe plans to provide water supply for the project:

vi. If water supply will be from wells (public or private), what is the maximum pumping capacity: ___________ gallons/minute.

d. Will the proposed action generate liquid wastes?
   - Yes ☐ No ☑

i. Total anticipated liquid waste generation per day: ___________ gallons/day

ii. Nature of liquid wastes to be generated (e.g., sanitary wastewater, industrial; if combination, describe all components and approximate volumes or proportions of each):

iii. Will the proposed action use any existing public wastewater treatment facilities?
   - Yes ☐ No ☑
   * Name of wastewater treatment plant to be used: Frank E. Van Lare WRRF
   * Name of district: Rochester Pure Waters District
   * Does the existing wastewater treatment plant have capacity to serve the project?
   * Is the project site in the existing district?
   * Is expansion of the district needed?
iv. Will a new wastewater (sewage) treatment district be formed to serve the project site? ☐ Yes ☑ No
If Yes:
- Applicant/sponsor for new district:
- Date application submitted or anticipated:
- What is the receiving water for the wastewater discharge?

v. If public facilities will not be used, describe plans to provide wastewater treatment for the project, including specifying proposed receiving water (name and classification if surface discharge or describe subsurface disposal plans):

vi. Describe any plans or designs to capture, recycle or reuse liquid waste:

vii. Will the proposed action disturb more than one acre and create stormwater runoff, either from new point sources (i.e., ditches, pipes, swales, curbs, gutters or other concentrated flows of stormwater) or non-point source (i.e., sheet flow) during construction or post construction? ☐ Yes ☑ No

i. How much impervious surface will the project create in relation to total size of project parcel?
   - Square feet or acres (impervious surface)
   - Square feet or acres (parcel size)

ii. Describe types of new point sources.

iii. Where will the stormwater runoff be directed (i.e., on-site stormwater management facility/structures, adjacent properties, groundwater, on-site surface water or off-site surface waters)?

   - If to surface waters, identify receiving water bodies or wetlands:

iv. Does the proposed plan minimize impervious surfaces, use pervious materials or collect and re-use stormwater? ☐ Yes ☑ No

v. Does the proposed action include, or will it use on-site, one or more sources of air emissions, including fuel combustion, waste incineration, or other processes or operations? ☐ Yes ☑ No
If Yes, identify:
   i. Mobile sources during project operations (e.g., heavy equipment, fleet or delivery vehicles)

   ii. Stationary sources during construction (e.g., power generation, structural heating, batch plant, crushers)

   iii. Stationary sources during operations (e.g., process emissions, large boilers, electric generation)

vi. Will any air emission sources named in D.2.f.(above), require a NY State Air Registration, Air Facility Permit, or Federal Clean Air Act Title IV or Title V Permit? ☐ Yes ☑ No
If Yes:
   i. Is the project site located in an Air quality non-attainment area? (Area routinely or periodically fails to meet ambient air quality standards for all or some parts of the year)

   ii. In addition to emissions as calculated in the application, the project will generate:

      - __________ Tons/year (short tons) of Carbon Dioxide (CO₂)
      - __________ Tons/year (short tons) of Nitrous Oxide (N₂O)
      - __________ Tons/year (short tons) of Perfluorocarbons (PFCs)
      - __________ Tons/year (short tons) of Sulfur Hexafluoride (SF₆)
      - __________ Tons/year (short tons) of Carbon Dioxide equivalent of Hydrofluorocarbons (HFCs)
      - __________ Tons/year (short tons) of Hazardous Air Pollutants (HAPs)
h. Will the proposed action generate or emit methane (including, but not limited to, sewage treatment plants, landfills, composting facilities)?
   Yes ☐ No ☑
   i. Estimate methane generation in tons/year (metric): ____________
   ii. Describe any methane capture, control or elimination measures included in project design (e.g. combustion to generate heat or electricity, flaring):
   ____________________________________________

i. Will the proposed action result in the release of air pollutants from open-air operations or processes, such as quarry or landfill operations?
   Yes ☐ No ☑
   If Yes: Describe operations and nature of emissions (e.g., diesel exhaust, rock particulates/dust):
   ____________________________________________

j. Will the proposed action result in a substantial increase in traffic above present levels or generate substantial new demand for transportation facilities or services?
   Yes ☐ No ☑
   i. When is the peak traffic expected (Check all that apply): ☐ Morning ☐ Evening ☐ Weekend
      ☐ Randomly between hours of ____________ to ____________
   ii. For commercial activities only, projected number of truck trips/day and type (e.g., semi trailers and dump trucks): ____________
   iii. Parking spaces: Existing ____________ Proposed ____________ Net increase/decrease ____________
   iv. Does the proposed action include any shared use parking? Yes ☐ No ☑
   v. If the proposed action includes any modification of existing roads, creation of new roads or change in existing access, describe:
   vi. Are public/private transportation service(s) or facilities available within ½ mile of the proposed site? Yes ☐ No ☑
   vii. Will the proposed action include access to public transportation or accommodations for use of hybrid, electric or other alternative fueled vehicles? Yes ☐ No ☑
   viii. Will the proposed action include plans for pedestrian or bicycle accommodations for connections to existing pedestrian or bicycle routes? Yes ☐ No ☑

k. Will the proposed action (for commercial or industrial projects only) generate new or additional demand for energy?
   Yes ☐ No ☑
   i. Estimate annual electricity demand during operation of the proposed action:
   ____________________________________________
   ii. Anticipated sources/suppliers of electricity for the project (e.g., on-site combustion, on-site renewable, via grid/local utility, or other):
   ____________________________________________
   iii. Will the proposed action require a new, or an upgrade, to an existing substation? Yes ☐ No ☑

I. Hours of operation. Answer all items which apply.
   i. During Construction:
      • Monday - Friday: 7 AM - 5 PM
      • Saturday: N/A
      • Sunday: N/A
      • Holidays: N/A
   ii. During Operations:
      • Monday - Friday: Continuous operation
      • Saturday: Continuous operation
      • Sunday: Continuous operation
      • Holidays: Continuous operation
n. Will the proposed action produce noise that will exceed existing ambient noise levels during construction, operation, or both? 
   If yes:
   i. Provide details including sources, time of day and duration:
      Construction may result in a temporary increase in noise.

ii. Will the proposed action remove existing natural barriers that could act as a noise barrier or screen? 
    Describe: Project may require removal of trees or vegetation within the area of disturbance.

a. Will the proposed action have outdoor lighting? 
   If yes:
   i. Describe source(s), location(s), height of fixture(s), direction/aim, and proximity to nearest occupied structures:

ii. Will proposed action remove existing natural barriers that could act as a light barrier or screen? 
    Describe:

v. Does the proposed action have the potential to produce odors for more than one hour per day? 
   If Yes, describe possible sources, potential frequency and duration of odor emissions, and proximity to nearest occupied structures:
   A temporary increase in odors may occur during construction, however no permanent impacts are anticipated.

p. Will the proposed action include any bulk storage of petroleum (combined capacity of over 1,100 gallons) or chemical products 185 gallons in above ground storage or any amount in underground storage? 
   If Yes:
   i. Product(s) to be stored
   ii. Volume(s) _____ per unit time ___________ (e.g., month, year)
   iii. Generally, describe the proposed storage facilities:

q. Will the proposed action (commercial, industrial and recreational projects only) use pesticides (i.e., herbicides, insecticides) during construction or operation? 
   If Yes:
   i. Describe proposed treatment(s):

ii. Will the proposed action use Integrated Pest Management Practices? 
   If Yes:

r. Will the proposed action (commercial or industrial projects only) involve or require the management or disposal of solid waste (excluding hazardous materials)? 
   If Yes:
   i. Describe any solid waste(s) to be generated during construction or operation of the facility:
      • Construction: ___________ tons per ___________ (unit of time)
      • Operation: ___________ tons per ___________ (unit of time)
   ii. Describe any proposals for on-site minimization, recycling or reuse of materials to avoid disposal as solid waste:
      • Construction:

   iii. Proposed disposal methods/facilities for solid waste generated on-site:
      • Construction:

      • Operation:
5. Does the proposed action include construction or modification of a solid waste management facility? □ Yes ☑ No
   If Yes:
   i. Type of management or handling of waste proposed for the site (e.g., recycling or transfer station, composting, landfill, or other disposal activities):
   ii. Anticipated rate of disposal/processing:
      * _______ Tons/month, if transfer or other non-combustion/thermal treatment, or
      * _______ Tons/hour, if combustion or thermal treatment
   iii. If landfill, anticipated site life: ____________________________ years
   iv. Will the proposed action at the site involve the commercial generation, treatment, storage, or disposal of hazardous waste? □ Yes ☑ No
      If Yes:
      i. Name(s) of all hazardous wastes or constituents to be generated, handled or managed at facility:
         ____________________________________________________________
      ii. Generally describe processes or activities involving hazardous wastes or constituents:
         ____________________________________________________________
      iii. Specify amount to be handled or generated _______ tons/month
      iv. Describe any proposals for on-site minimization, recycling or reuse of hazardous constituents:
         ____________________________________________________________
   v. Will any hazardous wastes be disposed at an existing offsite hazardous waste facility? □ Yes ☑ No
      If Yes: provide name and location of facility:
         ____________________________________________________________
      If No: describe proposed management of any hazardous wastes which will not be sent to a hazardous waste facility:
         ____________________________________________________________

E. Site and Setting of Proposed Action

E.1. Land uses on and surrounding the project site

a. Existing land uses.
   i. Check all uses that occur on, adjoining and near the project site.
   □ Urban □ Industrial ☑ Commercial □ Residential (suburban) □ Rural (non-farm)
   □ Forest □ Agriculture ☑ Aquatic □ Other (specify): Parkland
   ii. If mix of uses, generally describe:
      Proposed action is located within a park within the City of Rochester. Project includes parkland alteration for sanitary sewer easement (+/- 30 ft width)

b. Land uses and covertypes on the project site.

<table>
<thead>
<tr>

</tbody>
</table>
c. Is the project site presently used by members of the community for public recreation?  
   □ Yes □ No
   i. If Yes: explain: Project site is a public park.

d. Are there any facilities serving children, the elderly, people with disabilities (e.g., schools, hospitals, licensed  
   day care centers, or group homes) within 1500 feet of the project site?  
   □ Yes □ No
   If Yes,
   i. Identify Facilities:  
      Strong Memorial Hospital, Ronald McDonald House

e. Does the project site contain an existing dam?  
   □ Yes □ No
   If Yes:
   i. Dimensions of the dam and impoundment:
      • Dam height: ___________________________ feet  
      • Dam length: ___________________________ feet  
      • Surface area: ___________________________ acres  
      • Volume impounded: ___________________________ gallons OR acre-feet
   ii. Dam's existing hazard classification: __________________________________________
   iii. Provide date and summarize results of last inspection: __________________________

f. Has the project site ever been used as a municipal, commercial or industrial solid waste management facility,  
   or does the project site adjoin property which is now, or was at one time, used as a solid waste management facility?  
   □ Yes □ No
   If Yes:
   i. Has the facility been formally closed?  
      □ Yes □ No
      • If yes, cite sources/documentation: __________________________
   ii. Describe the location of the project site relative to the boundaries of the solid waste management facility:  
      ___________________________________________________________
   iii. Describe any development constraints due to the prior solid waste activities:  
      ___________________________________________________________

gh. Have hazardous wastes been generated, treated and/or disposed of at the site, or does the project site adjoin  
   property which is now or was at one time used to commercially treat, store and/or dispose of hazardous waste?  
   □ Yes □ No
   If Yes:
   i. Describe waste(s) handled and waste management activities, including approximate time when activities occurred:
      __________________________

h. Potential contamination history. Has there been a reported spill at the proposed project site, or have any  
   remedial actions been conducted at or adjacent to the proposed site?  
   □ Yes □ No
   If Yes:
   i. Is any portion of the site listed on the NYSDEC Spills Incidents database or Environmental Site  
      Remediation database? Check all that apply:
      □ Yes – Spills Incidents database  
      □ Yes – Environmental Site Remediation database  
      □ Neither database  
      Provide DEC ID number(s): 11 records closed see attached documents

   ii. If site has been subject of RCRA corrective activities, describe control measures:  
      ___________________________________________________________

   iii. Is the project within 2000 feet of any site in the NYSDEC Environmental Site Remediation database?  
       □ Yes □ No
       If Yes, provide DEC ID number(s):  

   iv. If yes to (i), (ii) or (iii) above, describe current status of site(s):  
       All NYSDEC spill incident files are listed as closed.
v. Is the project site subject to an institutional control limiting property uses?  
- Yes  
- No

iv. Describe the type of institutional control (e.g., deed restriction or easement): City of Rochester Zoning

v. Describe any use limitations: Zoning for Parkland

vi. Describe any engineering controls: N/A

vii. Will the project affect the institutional or engineering controls in place?  
- Yes
- No

Explain:

The project involves installation of an underground sewer facilities and conveyance of a sanitary sewer easement. Any alterations to the parkland will be minor and temporary.

E.2. Natural Resources On or Near Project Site

a. What is the average depth to bedrock on the project site?  
- >6.5 feet

b. Are there bedrock outcroppings on the project site?  
- Yes
- No

If Yes, what proportion of the site is comprised of bedrock outcroppings? %

c. Predominant soil type(s) present on project site:
   - Urban land - Ub  
   - Water - W  
   - %

  

  

d. What is the average depth to the water table on the project site? Average: 5.2 +/- feet

e. Drainage status of project site soils:
   - Well Drained: % of site
   - Moderately Well Drained: 100 % of site
   - Poorly Drained: % of site

f. Approximate proportion of proposed action site with slopes:
   - 0-10%: 100 % of site
   - 10-15%: % of site
   - 15% or greater: % of site

g. Are there any unique geologic features on the project site?  
- Yes
- No

If Yes, describe:

h. Surface water features:
   i. Does any portion of the project site contain wetlands or other waterbodies (including streams, rivers, ponds or lakes)?  
   - Yes
   - No

   ii. Do any wetlands or other waterbodies adjoin the project site?  
   - Yes
   - No

   If Yes to either i or ii, continue. If No, skip to E.2.i.

   iii. Are any of the wetlands or waterbodies within or adjoining the project site regulated by any federal, state or local agency?  
   - Yes
   - No

   iv. For each identified regulated wetland and waterbody on the project site, provide the following information:
      - Streams: Name Genesee River 820-2
      - Classification B
      - Lakes or Ponds: Name Classification
      - Wetlands: Name Federal waters Approximate Size
      - Wetland No. (if regulated by DEC)

   v. Are any of the above water bodies listed in the most recent compilation of NYS water quality-impaired waterbodies?  
   - Yes
   - No

If yes, name of impaired water body/bodies and basis for listing as impaired:

i. Polytans-Uses Genesee River, Lower, Main Stem Pathogens Nutrients Sediment Priority Organics Pesticides-Fish Consumption Public

j. Is the project site in a designated Floodway?  
- Yes
- No

k. Is the project site in the 100-year Floodplain?  
- Yes
- No

l. Is the project site in the 500-year Floodplain?  
- Yes
- No

m. Is the project site located over, or immediately adjoining, a primary, principal or sole source aquifer?  
- Yes
- No

If Yes:
   i. Name of aquifer:
m. Identify the predominant wildlife species that occupy or use the project site:

<table>
<thead>
<tr>
<th>Deer</th>
<th>Squirrels</th>
<th>Chipmunks</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Various birds</td>
<td>Various fish</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

n. Does the project site contain a designated significant natural community?  
   If Yes:  
      i. Describe the habitat/community (composition, function, and basis for designation):  

<table>
<thead>
<tr>
<th>Source(s) of description or evaluation:</th>
</tr>
</thead>
<tbody>
<tr>
<td>----------------------------------------</td>
</tr>
<tr>
<td>----------------------------------------</td>
</tr>
</tbody>
</table>

ii. Extent of community/habitat:  
   * Currently: 
   * Following completion of project as proposed:  
   * Gain or loss (indicate + or -):  

<table>
<thead>
<tr>
<th>acres</th>
<th>acres</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

o. Does project site contain any species of plant or animal that is listed by the federal government or NYS as endangered or threatened, or does it contain any areas identified as habitat for an endangered or threatened species?  
   If Yes:
   i. Species and listing (endangered or threatened):

p. Does the project site contain any species of plant or animal that is listed by NYS as rare, or as a species of special concern?  
   If Yes:
   i. Species and listing:

The project location is within a mussel screening stream (Genesee River) that contains the potential for S1 & S2 freshwater mussels (which are not listed by NYSDEC). No impact is currently expected, but will be confirmed through a geotechnical investigation.

q. Is the project site or adjoining area currently used for hunting, trapping, fishing or shell fishing?  
   If Yes, give a brief description of how the proposed action may affect that use:

Construction may temporarily reduce access to fishing areas. No permanent negative impacts are anticipated.

E.3. Designated Public Resources On or Near Project Site

a. Is the project site, or any portion of it, located in a designated agricultural district certified pursuant to Agriculture and Markets Law, Article 25-AAA, Section 303 and 304?  
   If Yes, provide county plus district name/number:

b. Are agricultural lands consisting of highly productive soils present?  
   i. If Yes: acreage(s) on project site:  
   ii. Source(s) of soil rating(s):

<table>
<thead>
<tr>
<th>Source(s) of soil rating(s):</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
</tr>

</table>

<table>
<thead>
<tr>
<th>Nature of the natural landmark:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
</tbody>
</table>

d. Is the project site located in or does it adjoin a state listed Critical Environmental Area?  
   If Yes:
   i. CEA name: Not named
   ii. Basis for designation: Environmentally sensitive
   iii. Designating agency and date: City of Rochester, March 14, 1986
e. Does the project site contain, or is it substantially contiguous to, a building, archaeological site, or district which is listed on the National or State Register of Historic Places, or that has been determined by the Commissioner of the NYS Office of Parks, Recreation and Historic Preservation to be eligible for listing on the State Register of Historic Places?  
   Yes ☐ No ☑
   If Yes:
   i. Nature of historic/archaeological resource: ☐ Archaeological Site ☑ Historic Building or District
   ii. Name: New York State Barge Canal Historic District
   iii. Brief description of attributes on which listing is based:

f. Is the project site, or any portion of it, located in or adjacent to an area designated as sensitive for archaeological sites on the NY State Historic Preservation Office (SHPO) archaeological site inventory?  
   Yes ☐ No ☑

F. Additional Information
Attach any additional information which may be needed to clarify your project.

If you have identified any adverse impacts which could be associated with your proposal, please describe those impacts plus any measures which you propose to avoid or minimize them.

G. Verification
I certify that the information provided is true to the best of my knowledge.

Applicant/Sponsor Name: Monroe County  Date: July 9, 2021

Signature: [Signature]
Title: Director of Environmental Services
Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency and the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:
- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer “Yes” to a numbered question, please complete all the questions that follow in that section.
- If you answer “No” to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box “Moderate to large impact may occur.”
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the “whole action”.
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

### 1. Impact on Land

Proposed action may involve construction on, or physical alteration of, the land surface of the proposed site. (See Part 1, D.1)

*If “Yes”, answer questions a-j. If “No”, move on to Section 2.*

<table>
<thead>
<tr>
<th>Question</th>
<th>Relevant Part 1 Question(s)</th>
<th>No, or small impact may occur</th>

<tr>
<td>i. The proposed action may affect the water quality of any water bodies within or downstream of the site of the proposed action.</td>
<td>E2h</td>
<td>○</td>
</tr>
<tr>
<td>j. The proposed action may involve the application of pesticides or herbicides in or around any water body.</td>
<td>D2q, E2h</td>
<td>○</td>
</tr>
<tr>
<td>k. The proposed action may require the construction of new, or expansion of existing, wastewater treatment facilities.</td>
<td>D1a, D2d</td>
<td>○</td>
</tr>
</tbody>
</table>
4. Impact on groundwater

The proposed action may result in new or additional use of ground water, or may have the potential to introduce contaminants to ground water or an aquifer. (See Part 1. D.2.a, D.2.c, D.2.d, D.2.p, D.2.q, D.2.t)

If "Yes", answer questions a - h. If "No", move on to Section 5.

PRINT FULL FORM
Full Environmental Assessment Form

Part 3 - Evaluation of the Magnitude and Importance of Project Impacts
and
Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:
To complete this section:
- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact.
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

Please see attached documentation supporting this determination.

Identify portions of EAF completed for this Project: Part 1 | Part 2 | Part 3 |

FEAF 2019
Upon review of the information recorded on this EAF, as noted, plus this additional support information Full Environmental Assessment Form (EAF) Part 3 and the supporting documentation to the EAF and project maps

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the Monroe County as lead agency that:

- **A.** This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

- **B.** Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

  - 

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.7(d)).

- **C.** This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.

Engineering, Architecture & Surveying, D.P.C.

THE CULVER ROAD ARMORY
145 CULVER ROAD, SUITE 160, ROCHESTER, NEW YORK 14620
TELEPHONE: (585) 381-9250  FAX: (585) 381-1008
Note: All potential impacts that have been identified in the Full EAF Part 2 as No or Small impacts have been described in this document. Numbering is consistent as outlined in Full EAF Part 2.

1. Impact of Land – The proposed action may involve construction on, or physical alteration of, the land surface of the proposed site. (See Part 1. D.1)

   f. The proposed action may result in increased erosion, whether from physical disturbance or vegetation removal (including from treatment by herbicides).

      • Small portions of the project will be stripped of vegetation and bare soils will be exposed during construction (approximately six months). These areas could be susceptible to potential erosion, with the potential of discharge of sediment into the existing waterways. However, approved erosion and sediment control measures as outlined in the design plans will be implemented during construction. Erosion and sediment control measures will be inspected to ensure proper installation and function throughout the construction phase.

3. Impacts on Surface Water – The proposed action may affect one or more wetlands or other surface water bodies (e.g., streams, rivers, ponds or lakes). (See Part 1. D.2, E.2.h)

   d. The proposed action may involve construction within or adjoining a freshwater or tidal wetland, or in the bed or banks of any other water body.

      • The proposed action is adjacent to the Genesee River and the NYS Barge Canal. The proposed action will involve directional drilling underneath the Genesee River, but will not include construction in the river nor along the riverbank. Extensive coordination with NYSDEC has begun regarding the proposed action. The proposed action will meet all NYSDEC and USACOE requirements, and Monroe County will obtain all required permits. Please see the attached New York State Department of Environmental Conservation Wetland Mapping, which shows that the proposed project area is not within or adjacent to any mapped wetlands, and as such, no impacts to wetlands will occur.

   e. The proposed action may create turbidity in a waterbody, either from upland erosion, runoff or by disturbing bottom sediments.

      • Small portions of the project, outside of waterbodies and wetlands, will be stripped of vegetation and bare soils will be exposed during construction (approximately six months). Any potential impacts to these waterbodies will be minimized through the use of erosion and sediment controls designed in accordance with the 2016 New York Standards and Specifications for Erosion and Sediment Control, and in accordance with the project plans and all permit requirements. The project also includes directional drilling underneath the Genesee River at a depth that is not expected to disturb bottom sediments. However, a geotechnical evaluation, as required by NYSDEC, is being performed to confirm that the directional drilling will not create turbidity in a waterbody. In the event the geotechnical evaluation does not conclusively rule out the potential for turbidity, any potential impact(s) will be mitigated prior to the construction phase through the permitting process with NYSDEC and USACOE.
h. The proposed action may cause soil erosion, or otherwise create a source of stormwater discharge that may lead to siltation or other degradation of receiving water bodies.

- Small portions of the project will be stripped of vegetation and bare soils will be exposed during construction (approximately six months). These areas could be susceptible to potential erosion, with the potential of discharge of sediment into the existing waterways. Approved erosion and sediment control measures as outlined in the design plans will be implemented during construction. Erosion and sediment control measures will be inspected to ensure proper installation and function throughout the construction phase.

i. The proposed action may affect the water quality of any water bodies within or downstream of the site of the proposed action.

- Small portions of the project may be susceptible to potential erosion during construction with the potential of discharge of sediment into existing waterways. Erosion and control measures will be designed and installed per the requirements set forth in the latest edition (2016) of the New York Standards and Specifications for Erosion and Sediment Control, and in compliance with all permits.

5. **Impact on Flooding** - The proposed action may result in development on lands subject to flooding. (See Part 1. E.2.)

a. The proposed action may result in development in a designated floodway.

b. The proposed action may result in development within a 100 year floodplain.

c. The proposed action may result in development within a 500 year floodplain.

- A portion of the project will be constructed within a designated floodway, and the 100 year and 500 year floodplains. However, no structures, permanent increases in impervious areas, nor permanent modifications to drainage patterns are proposed within the floodplains and floodway. Appropriate drainage measures will be installed during construction. The project will meet all NYSDEC requirements to assure that erosion and sedimentation, if any, are managed throughout the construction phase.

7. **Impact on Plants and Animals** - The proposed action may result in a loss of flora or fauna. (See Part 1. E.2. m.-q)

b. The proposed action may result in a reduction or degradation of any habitat used by any rare, threatened or endangered species, as listed by New York State or the federal government.

j. Other impacts: freshwater mussels.

- The portion of the Genesee River within the project area likely contains S1 and S2 freshwater mussels. A geotechnical evaluation, as required by NYSDEC, is being performed to determine that the directional drilling will not result in a reduction or degradation of any habitat. Coordination is ongoing with NYSDEC to ensure that any impacts of the proposed action are minimized.
9. **IMPACT ON AESTHETIC RESOURCES** - The land use of the proposed action are obviously different from, or are in sharp contrast to, current land use patterns between the proposed project and a scenic or aesthetic resource. (Part 1. E.1.a., E.1.b, E.3.h.)

   d. The situation or activity in which viewers are engaged while viewing the proposed action is:

   ii. Recreational or tourism based activities

   e. The proposed action may cause a diminishment of the public enjoyment and appreciation of the designated aesthetic resource.

   - Portions of the proposed project area include Genesee Valley Park, the Genesee River, and the NYS Barge Canal Historic District. The proposed pump station is the only above-ground structure that will not be flush with the surface. Any potential visual impact of the pump station will be mitigated by setting the pump back from the park and outside the NYS Barge Canal Historic District on land currently owned by the University of Rochester. Trees and other existing vegetative screening will be preserved where possible to screen the station from the park and historic district. Construction activities may temporarily impact enjoyment of these resources due to increased noise, odors, and traffic during; however, these temporary impacts will be minimized by limiting construction to standard hours (Monday-Friday).

10. **IMPACT ON HISTORIC AND ARCHEOLOGICAL RESOURCES** - The proposed action may occur in or adjacent to a historic or archaeological resource. (Part 1. E.3.e, f. and g.)

   a. The proposed action may occur wholly or partially within, or substantially contiguous to, any buildings, archaeological site or district which is listed on the National or State Register of Historical Places, or that has been determined by the Commissioner of the NYS Office of Parks, Recreation and Historic Preservation to be eligible for listing on the State Register of Historic Places.

   - Portions of the proposed project area include Genesee Valley Park, the Genesee River, and the NYS Barge Canal Historic District. The proposed pump station is the only above-ground structure that will not be flush with the surface. Any potential visual impact of the pump station will be mitigated by setting the pump back from the park and outside the NYS Barge Canal Historic District on land currently owned by the University of Rochester. Trees and other existing vegetative screening will be preserved where possible to screen the station from the park and historic district. As such, the project is not expected to have a permanent impact on historic or archaeological resources. However, a consultation project has been submitted using the SHPO Cultural Resource Information System (CRIS) website. No response has been received from NYS SHPO as of yet. Construction will not commence unless and until we receive a determination that the project will have No Effect or No Adverse Effect on historic/cultural properties.
b. The proposed action may occur wholly or partially within, or substantially contiguous to, an area designated as sensitive for archaeological sites on the NY State Historic Preservation Office (SHPO) archaeological site inventory.

- The project is located within archeological sensitive areas. However, a majority of the work will occur approximately thirty (30) feet underground and surface work will be performed in previously disturbed soils. As such, the project is not expected to have a permanent impact on historic or archeological resources. However, a consultation project has been submitted using the SHPO Cultural Resource Information System (CRIS) website. No response has been received from NYS SHPO as of yet. Construction will not commence unless and until we receive a determination that the project will have No Effect or No Adverse Effect.

11. IMPACT ON OPEN SPACE AND RECREATION – The proposed action may result in a loss of recreational opportunities or a reduction of an open space resource as designated in any adopted municipal open space plan. (Part 1.C.2.c, E.1.c, E.2.q.)

e. Other impacts: sanitary sewer facilities to be located within easement through park land.

- The proposed project includes installation of sanitary sewer facilities and the conveyance of a sanitary sewer easement through Genesee Valley Park and under the Genesee River. This may limit future sub-surface park uses within the sanitary sewer easement itself, but such impact will be mitigated by the fair market value of the easement being determined and dedicated toward the acquisition of additional parkland and/or the capital improvements of existing park facilities during the parkland alienation process. Construction activities may temporarily impact small areas in the park; however, these areas will be restored and continued to be used for park purposes post-construction. Accordingly, no permanent impacts from construction are expected and no loss of recreational opportunities or a reduction of an open space resource will occur.

12. IMPACT ON CRITICAL ENVIRONMENTAL AREAS – The proposed action may be located within or adjacent to a critical environmental area (CEA). (Part 1.E.3.d.)

e. Other impacts: project site is located within or adjacent to Critical Environmental Areas.

- The proposed project is located within or adjacent to a Critical Environmental Area designated by the City of Rochester on March 14, 1986, on the basis of being an environmentally sensitive area. Coordination with NYSDEC is ongoing, and the project will comply with all required environmental permits and NYSDEC standards.

15. IMPACT ON NOISE, ODOR, AND LIGHT - The proposed action may result in an increase in noise, odors, or outdoor lighting. (See Part 1.D.2.m., n., and o)

f. Other impacts: noise and odors during construction.
- Noise levels may exceed ambient conditions during the construction phase, and mobile sources associated with construction may temporarily emit air emissions and/or odors. However, these impacts will be small to moderate and would be temporary in nature. Construction activities will be limited to the days and times allowed by local regulation.

16. IMPACT ON HUMAN HEALTH - The proposed action may have an impact on human health from exposure to new or existing sources of contaminants. (See Part 1. D.2.a., E.1. d. f. g. and h.)

m. Other impacts: Spills Incident Database indicates previously closed spills incidents in project site or vicinity.

- The NYSDEC Spills Incident Database indicates that spills were reported within the project site or within the vicinity of the project site. All spill incidents found in the database have been closed by NYSDEC. If any signs of contaminated soils are encountered the project will stop work and NYSDEC will be contacted.

18. CONSISTENCY WITH COMMUNITY CHARACTER - The proposed project is inconsistent with the existing community character. (See Part 1. C.2, C.3, D.2, E.3)

- The Project is consistent with the existing community character. However, it is possible that expanding sewer capacity within the Wilson Boulevard Trunk sewer sewershed could have a secondary impact of inducing growth in the area. Given that the sewershed is already developed, though, any such growth would most likely be limited to small-scale infill of urban or suburban lots, consistent with applicable zoning laws and the City of Rochester's comprehensive plan. Conversely, in the event large-scale development is proposed, such as the University of Rochester's emergency room expansion, any impacts would be reviewed and, if necessary, mitigated as part of the development's approval requirements.

Type: Riverine
Acres: 1672.468639649
For more information about the National Wetlands Inventory wetlands visit http://www.fws.gov/wetlands/

If your project or action is within or near an area with a rare animal, a permit may be required if the species is listed as endangered or threatened and the department determines the action may be harmful to the species or its habitat.

If your project or action is within or near an area with rare plants and/or significant natural communities, the environmental impacts may need to be addressed.

The presence of a unique geological feature or landform near a project, unto itself, does not trigger a requirement for a NYS DEC permit. Readers are advised, however, that there is the chance that a unique feature may also show in another data layer (i.e. a wetland) and thus be subject to permit jurisdiction.

Please refer to the "Need a Permit?" tab for permit information or other authorizations regarding these natural resources.

Disclaimer: If you are considering a project or action in, or near, a wetland or a stream, a NYS DEC permit may be required. The Environmental Resources Mapper does not show all natural resources which are regulated by NYS DEC, and for which permits from NYS DEC are required. For example, Regulated Tidal Wetlands, and Wild, Scenic, and Recreational Rivers, are currently not included on the maps.

"Date Spill Closed" means the date the spill case was closed by the case manager in the Department of Environmental Conservation (the Department). The spill case was closed because either; a) the records and data submitted indicate that the necessary cleanup and removal actions have been completed and no further remedial activities are necessary, or b) the case was closed for administrative reasons (e.g., multiple reports of a single spill consolidated into a single spill number). The Department however reserves the right to require additional remedial work in relation to the spill, if in the future it determines that further action is necessary.

If you have questions about this reported incident, please contact the Regional Office where the incident occurred.

Custom Soil Resource Report for
Monroe County, New York
Genesee Valley PS and FM
Preface

Soil surveys contain information that affects land use planning in survey areas. They highlight soil limitations that affect various land uses and provide information about the properties of the soils in the survey areas. Soil surveys are designed for many different users, including farmers, ranchers, foresters, agronomists, urban planners, community officials, engineers, developers, builders, and home buyers. Also, conservationists, teachers, students, and specialists in recreation, waste disposal, and pollution control can use the surveys to help them understand, protect, or enhance the environment.

Various land use regulations of Federal, State, and local governments may impose special restrictions on land use or land treatment. Soil surveys identify soil properties that are used in making various land use or land treatment decisions. The information is intended to help the land users identify and reduce the effects of soil limitations on various land uses. The landowner or user is responsible for identifying and complying with existing laws and regulations.

Although soil survey information can be used for general farm, local, and wider area planning, onsite investigation is needed to supplement this information in some cases. Examples include soil quality assessments (http://www.nrcs.usda.gov/wps/portal/nrcs/main/soils/health/) and certain conservation and engineering applications. For more detailed information, contact your local USDA Service Center (https://offices.sc.egov.usda.gov/locator/app?agency=nrcs) or your NRCS State Soil Scientist (http://www.nrcs.usda.gov/wps/portal/nrcs/detail/soils/contactus/?cid=nrcs142p2_053951).

Great differences in soil properties can occur within short distances. Some soils are seasonally wet or subject to flooding. Some are too unstable to be used as a foundation for buildings or roads. Clayey or wet soils are poorly suited to use as septic tank absorption fields. A high water table makes a soil poorly suited to basements or underground installations.

The National Cooperative Soil Survey is a joint effort of the United States Department of Agriculture and other Federal agencies, State agencies including the Agricultural Experiment Stations, and local agencies. The Natural Resources Conservation Service (NRCS) has leadership for the Federal part of the National Cooperative Soil Survey.

Information about soils is updated periodically. Updated information is available through the NRCS Web Soil Survey, the site for official soil survey information.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require
alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410 or call (800) 795-3272 (voice) or (202) 720-5382 (TDD). USDA is an equal opportunity provider and employer.

How Soil Surveys Are Made

Soil surveys are made to provide information about the soils and miscellaneous areas in a specific area. They include a description of the soils and miscellaneous areas and their location on the landscape and tables that show soil properties and limitations affecting various uses. Soil scientists observed the steepness, length, and shape of the slopes; the general pattern of drainage; the kinds of crops and native plants; and the kinds of bedrock. They observed and described many soil profiles. A soil profile is the sequence of natural layers, or horizons, in a soil. The profile extends from the surface down into the unconsolidated material in which the soil formed or from the surface down to bedrock. The unconsolidated material is devoid of roots and other living organisms and has not been changed by other biological activity.

Currently, soils are mapped according to the boundaries of major land resource areas (MLRAs). MLRAs are geographically associated land resource units that share common characteristics related to physiography, geology, climate, water resources, soils, biological resources, and land uses (USDA, 2006). Soil survey areas typically consist of parts of one or more MLRA.

The soils and miscellaneous areas in a survey area occur in an orderly pattern that is related to the geology, landforms, relief, climate, and natural vegetation of the area. Each kind of soil and miscellaneous area is associated with a particular kind of landform or with a segment of the landform. By observing the soils and miscellaneous areas in the survey area and relating their position to specific segments of the landform, a soil scientist develops a concept, or model, of how they were formed. Thus, during mapping, this model enables the soil scientist to predict with a considerable degree of accuracy the kind of soil or miscellaneous area at a specific location on the landscape.

Commonly, individual soils on the landscape merge into one another as their characteristics gradually change. To construct an accurate soil map, however, soil scientists must determine the boundaries between the soils. They can observe only a limited number of soil profiles. Nevertheless, these observations, supplemented by an understanding of the soil-vegetation-landscape relationship, are sufficient to verify predictions of the kinds of soil in an area and to determine the boundaries.

Soil scientists recorded the characteristics of the soil profiles that they studied. They noted soil color, texture, size and shape of soil aggregates, kind and amount of rock fragments, distribution of plant roots, reaction, and other features that enable them to identify soils. After describing the soils in the survey area and determining their properties, the soil scientists assigned the soils to taxonomic classes (units). Taxonomic classes are concepts. Each taxonomic class has a set of soil characteristics with precisely defined limits. The classes are used as a basis for comparison to classify soils systematically. Soil taxonomy, the system of taxonomic classification used in the United States, is based mainly on the kind and character of soil properties and the arrangement of horizons within the profile. After the soil
scientists classified and named the soils in the survey area, they compared the
individual soils with similar soils in the same taxonomic class in other areas so that
they could confirm data and assemble additional data based on experience and
research.

The objective of soil mapping is not to delineate pure map unit components; the
objective is to separate the landscape into landforms or landform segments that
have similar use and management requirements. Each map unit is defined by a
unique combination of soil components and/or miscellaneous areas in predictable
proportions. Some components may be highly contrasting to the other components
of the map unit. The presence of minor components in a map unit in no way
diminishes the usefulness or accuracy of the data. The delineation of such
landforms and landform segments on the map provides sufficient information for the
development of resource plans. If intensive use of small areas is planned, onsite
investigation is needed to define and locate the soils and miscellaneous areas.

Soil scientists make many field observations in the process of producing a soil map.
The frequency of observation is dependent upon several factors, including scale of
mapping, intensity of mapping, design of map units, complexity of the landscape,
and experience of the soil scientist. Observations are made to test and refine the
soil-landscape model and predictions and to verify the classification of the soils at
specific locations. Once the soil-landscape model is refined, a significantly smaller
number of measurements of individual soil properties are made and recorded.
These measurements may include field measurements, such as those for color,
depth to bedrock, and texture, and laboratory measurements, such as those for
content of sand, silt, clay, salt, and other components. Properties of each soil
typically vary from one point to another across the landscape.

Observations for map unit components are aggregated to develop ranges of
characteristics for the components. The aggregated values are presented. Direct
measurements do not exist for every property presented for every map unit
component. Values for some properties are estimated from combinations of other
properties.

While a soil survey is in progress, samples of some of the soils in the area generally
are collected for laboratory analyses and for engineering tests. Soil scientists
interpret the data from these analyses and tests as well as the field-observed
characteristics and the soil properties to determine the expected behavior of the
soils under different uses. Interpretations for all of the soils are field tested through
observation of the soils in different uses and under different levels of management.
Some interpretations are modified to fit local conditions, and some new
interpretations are developed to meet local needs. Data are assembled from other
sources, such as research information, production records, and field experience of
specialists. For example, data on crop yields under defined levels of management
are assembled from farm records and from field or plot experiments on the same
kinds of soil.

Predictions about soil behavior are based not only on soil properties but also on
such variables as climate and biological activity. Soil conditions are predictable over
long periods of time, but they are not predictable from year to year. For example,
soil scientists can predict with a fairly high degree of accuracy that a given soil will
have a high water table within certain depths in most years, but they cannot predict
that a high water table will always be at a specific level in the soil on a specific date.

After soil scientists located and identified the significant natural bodies of soil in the
survey area, they drew the boundaries of these bodies on aerial photographs and
identified each as a specific map unit. Aerial photographs show trees, buildings, fields, roads, and rivers, all of which help in locating boundaries accurately.
Soil Map

The soil map section includes the soil map for the defined area of interest, a list of soil map units on the map and extent of each map unit, and cartographic symbols displayed on the map. Also presented are various metadata about data used to produce the map, and a description of each soil map unit.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:15,800.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Monroe County, New York
Survey Area Date: Version 19, Jun 11, 2020

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: May 27, 2020—Jun 15, 2020

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Map Unit Descriptions

The map units delineated on the detailed soil maps in a soil survey represent the soils or miscellaneous areas in the survey area. The map unit descriptions, along with the maps, can be used to determine the composition and properties of a unit.

A map unit delineation on a soil map represents an area dominated by one or more major kinds of soil or miscellaneous areas. A map unit is identified and named according to the taxonomic classification of the dominant soils. Within a taxonomic class there are precisely defined limits for the properties of the soils. On the landscape, however, the soils are natural phenomena, and they have the characteristic variability of all natural phenomena. Thus, the range of some observed properties may extend beyond the limits defined for a taxonomic class. Areas of soils of a single taxonomic class rarely, if ever, can be mapped without including areas of other taxonomic classes. Consequently, every map unit is made up of the soils or miscellaneous areas for which it is named and some minor components that belong to taxonomic classes other than those of the major soils.

Most minor soils have properties similar to those of the dominant soil or soils in the map unit, and thus they do not affect use and management. These are called noncontrasting, or similar, components. They may or may not be mentioned in a particular map unit description. Other minor components, however, have properties and behavioral characteristics divergent enough to affect use or to require different management. These are called contrasting, or dissimilar, components. They generally are in small areas and could not be mapped separately because of the scale used. Some small areas of strongly contrasting soils or miscellaneous areas are identified by a special symbol on the maps. If included in the database for a given area, the contrasting minor components are identified in the map unit descriptions along with some characteristics of each. A few areas of minor components may not have been observed, and consequently they are not mentioned in the descriptions, especially where the pattern was so complex that it was impractical to make enough observations to identify all the soils and miscellaneous areas on the landscape.

The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The objective of mapping is not to delineate pure taxonomic classes but rather to separate the landscape into landforms or landform segments that have similar use and management requirements. The delineation of such segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, however,
onsite investigation is needed to define and locate the soils and miscellaneous areas.

An identifying symbol precedes the map unit name in the map unit descriptions. Each description includes general facts about the unit and gives important soil properties and qualities.

Soils that have profiles that are almost alike make up a soil series. Except for differences in texture of the surface layer, all the soils of a series have major horizons that are similar in composition, thickness, and arrangement.

Soils of one series can differ in texture of the surface layer, slope, stoniness, salinity, degree of erosion, and other characteristics that affect their use. On the basis of such differences, a soil series is divided into soil phases. Most of the areas shown on the detailed soil maps are phases of soil series. The name of a soil phase commonly indicates a feature that affects use or management. For example, Alpha silt loam, 0 to 2 percent slopes, is a phase of the Alpha series.

Some map units are made up of two or more major soils or miscellaneous areas. These map units are complexes, associations, or undifferentiated groups.

A complex consists of two or more soils or miscellaneous areas in such an intricate pattern or in such small areas that they cannot be shown separately on the maps. The pattern and proportion of the soils or miscellaneous areas are somewhat similar in all areas. Alpha-Beta complex, 0 to 6 percent slopes, is an example.

An association is made up of two or more geographically associated soils or miscellaneous areas that are shown as one unit on the maps. Because of present or anticipated uses of the map units in the survey area, it was not considered practical or necessary to map the soils or miscellaneous areas separately. The pattern and relative proportion of the soils or miscellaneous areas are somewhat similar. Alpha-Beta association, 0 to 2 percent slopes, is an example.

An undifferentiated group is made up of two or more soils or miscellaneous areas that could be mapped individually but are mapped as one unit because similar interpretations can be made for use and management. The pattern and proportion of the soils or miscellaneous areas in a mapped area are not uniform. An area can be made up of only one of the major soils or miscellaneous areas, or it can be made up of all of them. Alpha and Beta soils, 0 to 2 percent slopes, is an example.

Some surveys include miscellaneous areas. Such areas have little or no soil material and support little or no vegetation. Rock outcrop is an example.
Monroe County, New York

Ub—Urban land

Map Unit Setting
National map unit symbol: 9 in 8
Mean annual precipitation: 30 to 35 inches
Mean annual air temperature: 46 to 50 degrees F
Frost-free period: 145 to 190 days
Farmland classification: Not prime farmland

Map Unit Composition
Urban land: 80 percent
Minor components: 20 percent
Estimates are based on observations, descriptions, and transects of the mapunit.

RESOLUTION NO. 293 OF 2021

AUTHORIZING ACCEPTANCE OF ENGINEERING PLANNING GRANT FROM NEW YORK STATE ENVIRONMENTAL FACILITIES CORPORATION FOR GENESEE VALLEY PUMP STATION PROJECT

BE IT RESOLVED BY THE LEGISLATURE OF THE COUNTY OF MONROE, as follows:

Section 1. The County Executive, or his designee, is hereby authorized to execute a Grant Agreement with the New York State Environmental Facilities Corporation and any and all other contracts, documents, and instruments necessary to bring about the project and to fulfill Monroe County’s obligations under the Grant Agreement for the Genesee Valley Pump Station Project (EPG Application Number 105197).

Section 2. The 2021 operating budget of the Department of Environmental Services is hereby amended by appropriating the sum of $50,000 into pure waters fund 9007, funds center 8572010000 Pure Waters Administration.

Section 3. The County Executive is hereby authorized to appropriate a minimum 20% local match, in addition to in-kind services, as required by the EPG Program for the Genesee Valley Pump Station Project (EPG Application Number 105197). Under the EPG Program, this local match must be at least 20% of the EPG grant award of $50,000. The source of the local match and any amount in excess of the required local match is included in the 2021 operating budget of the Department of Environmental Services, pure waters fund 9007, funds center 8572010000 Pure Waters Administration.

Section 4. The County Executive is hereby authorized to appropriate any subsequent years of the grant award in accordance with the grant terms, to reappropriate any unencumbered balances during the grant period according to the grantor requirements, and to make any necessary funding modifications within the grant guidelines to meet contractual commitments.

Section 5. Should funding of this program be modified or terminated for any reason, the County Executive is hereby authorized to terminate or modify the program and, where applicable, to terminate or abolish some or all positions funded under such program. Any termination or abolishment of positions shall be in accordance with New York State Civil Service Law and, when applicable, the terms of any labor agreement affecting such positions.

Section 6. This resolution shall take effect in accordance with Section C2-7 of the Monroe County Charter.

RESOLUTION NO. 294 OF 2021

AUTHORIZING CONTRACTS WITH MRB GROUP FOR PROFESSIONAL ENGINEERING SERVICES AND UNIVERSITY OF ROCHESTER FOR GENESEE VALLEY PUMP STATION PROJECT

BE IT RESOLVED BY THE LEGISLATURE OF THE COUNTY OF MONROE, as follows:

Section 1. The County Executive, or his designee, is hereby authorized to execute a contract with MRB Group in the amount of $346,670 for professional engineering services for the Genesee Valley Pump Station project, and any amendments necessary to complete the project within the total capital fund(s) appropriation.

Section 2. The County Executive, or his designee, is hereby authorized to execute a contract with the University of Rochester for financial participation in and the conveyance of interest in real property for the Genesee Valley Pump Station project.

Section 3. Funding for this project, consistent with authorized uses, will be included in the capital fund 2009 and in any other capital fund(s) created for the same intended purpose. The local funding for this project will ultimately be provided by Pure Waters District user fees.

Section 4. This resolution shall take effect in accordance with Section C2-7 of the Monroe County Charter.

ACCEPTING GRANT FROM NEW YORK STATE GOVERNOR’S TRAFFIC SAFETY COMMITTEE FOR HIGHWAY SAFETY PROGRAM

BE IT RESOLVED BY THE LEGISLATURE OF THE COUNTY OF MONROE, as follows:

Section 1. The County Executive, or his designee, is hereby authorized to accept a $103,200 grant from, and to execute a contract and any amendments thereto with, the New York State Governor’s Traffic Safety Committee for the Highway Safety Program for the period of October 1, 2021 through September 30, 2022.

Section 2. The 2021 operating budget of the Department of Public Safety is hereby amended by appropriating the sum of $103,200 into general fund 9300, funds center 2405100000, Community Traffic Safety Program.

Section 3. The County Executive is hereby authorized to appropriate any subsequent years of the grant award in accordance with the grant terms, to reappropriate any unencumbered balances during the grant period according to the grantor requirements and to make any necessary funding modifications within the grant guidelines to meet contractual commitments.

Section 4. Should funding of this program be modified or terminated for any reason, the County Executive is hereby authorized to terminate or modify the program and, where applicable, to terminate or abolish some or all positions funded under such program. Any termination or abolishment of positions shall be in accordance with New York State Civil Service Law and, when applicable, the terms of any labor agreement affecting such positions.

Section 5. This resolution shall take effect in accordance with Section C2-7 of the Monroe County Charter.

Intro. No. 429

RESOLUTION NO. 311 OF 2021

APPOINTMENTS TO THE LEGISLATIVE DISTRICT REVISION COMMITTEE

BE IT RESOLVED BY THE LEGISLATURE OF THE COUNTY OF MONROE, as follows:

Section 1. Pursuant to Section C2-12 of the Monroe County Charter, the following are hereby appointed to the Legislative District Revision Commission:

Dr. Joe Carbone, President of the Monroe County Legislature, Chairman
Legislator Steve Brew, Republican Majority Party Representative
Legislator Joshua Bauroth, Democratic Minority Party Representative
Lisa Nicolay, Monroe County Elections Commissioner
Jackie Ortiz, Monroe County Elections Commissioner

Section 2. In accordance with Section C2-12, the Commission shall study the official census data and make recommendations to the Legislature in the form of a proposed local law as to changes in the boundaries of legislative districts, within three months after the appointment of this Commission.

Section 3. This resolution shall take effect immediately.
