Questions Related to Monroe County Land Bank RFP – Demolition Services for 5 Beechwood

Drive

Received as of June 4, 2026

Q: Is there an asbestos survey for this project? If not, will the structure be condemned?

A: It is our understanding the building has structural or interior hazards to a degree that it is unsafe to enter. We have requested the town evaluate the structure and determine if condemnation is warranted. If the structure is condemned, a controlled demolition, as identified in the RFP will be conducted. If the building is not condemned we will conduct an asbestos survey and asbestos abatement prior to demolition.
