

# Greater Rochester International Airport

## First Quarter Newsletter 2005

Monroe County and the Greater Rochester International Airport have recently made numerous improvements to help passengers travel through the terminal with greater ease. The newly opened six-lane Central Security Checkpoint has decreased wait times and made travel more efficient and convenient.

In addition, passengers now have full access to the many restaurants, shops and complimentary business center that our Airport offers. Passenger boardings at the Airport reached an all-time high in 2004 and with our ongoing terminal improvements and the presence of low-fare carriers, we expect continued growth.

### Parking Rewards & Zoom Lane Program

Passengers should familiarize themselves with two airport parking programs.

The first program is the Parking Rewards program. If you fill out a membership registration form you receive a frequent parking card that can earn you FREE parking. For each day of parking at GRIA, the card will get one credit punch. When 20 punches are accumulated, travelers will get 2 FREE days of airport parking.

The Zoom Lane electronic pass program eliminates waiting at toll plazas to exit airport parking lots. The electronic pass is mounted on the inside of the car windshield and is read by the antennas at every tollbooth and gate to the parking lots. One lane is always dedicated as Zoom Lane only. Parking fees automatically charge to the designated credit card and at the end of the month users receive a detailed statement. Now travelers can enter and exit the garage and short-term parking lots without having to stop to pay.

For more information or to register for the Parking Rewards or Zoom Lane pass programs call (585) 464-6099, or visit [www.amparking.com](http://www.amparking.com)

### How to use the Airport Website

Visit [www.monroecounty.gov](http://www.monroecounty.gov) and click on The Greater Rochester International Airport link for up-to-date information, to check flight schedules, get travel tips, view upcoming special events and more.

### Terminal Renovation Update

The new six-lane Central Security Checkpoint opened on February 1, 2005. Many improvements have taken place in the terminal including new central escalators and elevator, relocation of our car rental companies, two new upper level restrooms with nursing areas for mothers and the addition of family restrooms.
